

Décomposer un nombre (2)

Pour décomposer un nombre, je l'écris sous la forme d'une addition :

$$232 = 200 + 30 + 2$$

$$= 100 + 100 + 10 + 10 + 10 + 2$$

Base ten blocks representing the decomposition of 232 into 100, 100, 10, 10, 10, and 2. The number 232 is shown in large, colorful digits (blue for 2, green for 3, yellow for 2). Below it, the decomposition is shown with blocks: two blue squares (100 + 100), three green rods (10 + 10 + 10), and two yellow cubes (2).
