ATTITUDE

Keyboard 2

INTRODUCTION

Why did you buy this book, too?

You bought it because you love learning to play the keyboard. And we're glad—it's a great instrument!

We assume that you've already completed (and reviewed a couple hundred times) **FastTrack™ Keyboard 1**. If not, please consider going through it first. (We'd hate to cover something before you're ready.)

In any case, this book picks up right where **Book 1** ended. You'll learn lots more chords, plenty of cool techniques, and an in-depth look at the most popular styles in today's music. And, of course, the last section of all the **FastTrack™** books is the same so that you and your friends can form a band and jam together!

So, if you still feel ready for this book, finish your pizza, put the cat outside, take the phone off the hook, and let's jam...

Always remember the three Ps: **patience, practice** and **pace yourself**. We'll add one more to this list: be **proud of yourself** for a job well-done.

ABOUT THE CD

(no, it's not a Frisbee!)

We're glad you noticed the added bonus—a CD! Each music example in the book is included on the CD, so you can hear how it sounds and play along when you're ready. Take a listen whenever you see this symbol: 

Each example on the CD is preceded by one measure of "clicks" to indicate the tempo and meter. Pan right to hear the keyboard part emphasized. Pan left to hear the accompaniment emphasized. As you become more confident, try playing along with the rest of the band.

LESSON 1

You wanna rock!

How you play is as important (if not more important) as **what** you play. In this book, we'll show you some common styles used in today's music. You can apply these styles to almost any song.

As we introduce each style, notice how the following musical elements change:

Chord progression

Rhythmic groove

Note choice

We'll also learn new chords, rhythms, and techniques as we go. Let's get started with an all-time favorite...

Rock 'n' Roll

Rock music comes in many styles—classic rock, blues rock, easy rock, hard rock, heavy metal. Its roots date from the 1950s with such legends as Elvis Presley, Jerry Lee Lewis, and The Beatles. Track 1 is an example of '50s rock 'n' roll. Listen and then play along:

◆ Golden Oldie

The musical notation for "Golden Oldie" is presented in four staves of music. The key signature is one sharp (F#) and the time signature is 4/4. The rhythm is a consistent eighth-note pattern. The chords are indicated above the staff: G (first staff), C (second staff), D (third staff), and D7 (fourth staff).

2 It's Here to Stay

Musical notation for "It's Here to Stay" in G major, 4/4 time. The first staff shows a sequence of chords: C, G, C, G. The second staff continues with C, A7, and D7. The melody consists of quarter notes on the G4 line, with rests on the other lines.

Hard Rock and Heavy Metal

Moving up through the decades, rock music transformed into a harder sound found in the music of Led Zeppelin, Aerosmith, and Van Halen. The following examples imitate hard rock and heavy metal styles:

3 All Along the Sidewalk

Musical notation for "All Along the Sidewalk" in E minor, 4/4 time. The first staff shows a sequence of chords: Em, D, C, D, Em. The melody consists of quarter notes on the E4 line, with rests on the other lines.

4 Go Ahead!

Musical notation for "Go Ahead!" in G major, 4/4 time. The first staff shows a sequence of chords: G, C, F, G, G, C, F, G. The second staff continues with C, F, C, G, C, C, F, G. The melody consists of quarter notes on the G4 line, with rests on the other lines.

5 Glam Rock

Musical notation for "Glam Rock" in C minor, 4/4 time. The first staff shows a sequence of chords: Cm, A^b, B^b. The second staff continues with Cm, A^b, B^b. The melody consists of quarter notes on the C4 line, with rests on the other lines.

Rock music isn't (usually) slow. Sometimes you'll want to play faster than eighth notes but in the same tempo. How's that done? Welcome to the world of sixteenths...

Sixteenth Notes

These have two flags or beams:

Sixteenth rests look like eighth rests but with (you're way ahead of us!) two flags: $\frac{1}{16}$

Yuck, more math...

Two sixteenths equal one eighth (just like fractions), and four sixteenths equal one quarter. Here's a diagram showing the relationship of all the rhythmic values you've learned:

To count sixteenths, divide the beat even further by counting "1 e & a, 2 e & a, 3 e & a, 4 e & a":

Listen to track 6 on the CD (with steady quarter note clicks throughout) to hear this new faster rhythm.

Progressively Faster

Now try playing it. Remember to play slowly at first and speed up the tempo only as it becomes easier.

You gotta know how to play chords with sixteenths, too...

7 Rockin' Sixteenths

Two staves of music in 2/4 time. The first staff contains four measures of chords: D, Bm, G, and A. The second staff contains four measures of chords: D, Bm, G, and A. Each chord is played as a block of sixteenth notes.

And, of course, let's try a song with sixteenths in the melody...

METER ALERT: The next tune is in 2/4 meter. (Don't panic—it's nothing really new!) A quarter note still equals one beat and each measure simply contains two beats.

8 Arkansas Traveler

Five staves of music in 2/4 time. The first staff contains four measures of chords: D, G, D, A7, D. The second staff contains five measures of chords: E7, A7, D, G, D. The third staff contains four measures of chords: G, A7, D, A7. The fourth staff contains five measures of chords: D, A7, D, A7, D, A7. The fifth staff contains eight measures of chords: D, A7, D, A7, D, G, A7, D.

We like to encourage breaks on a regular basis, and this is no exception. Take five and we'll see you back here for Lesson 2.

LESSON 2

Keys, please...

Remember **key signatures** from Book 1? These tell you two important things about a song:

- 1 Notes to play sharp or flat throughout the piece
- 2 Song's key

A song's **key** is determined by the scale used to create the song. For example, a song based on the G major scale is said to be in the **key of G**. And since the G major scale contains one sharp (F#), the key signature will show one sharp on the F-line.

Here are some common (and easy) keys:

Key of C

...based on the C major scale, which has no sharps or flats:

◆ I've Been Rockin' on the Railroad

C C7 F C

D7 G7

C F E7

F C G7 C

NOTE: The key of C looks like there is no key signature, since there are no sharps or flats.

Key of G

...based on the G major scale, which has one sharp—F#:

10 Shenandoah

Key of F

...based on the F major scale, which has one flat—Bb:

11 Oh, Susanna

Key of D

This one has two sharps (F# and C#) and is based on (you guessed it!) the D major scale:

12 The Yellow Rose of Texas

D

A7

D D7

A7 D E7 A7 D

Key of Bb

This one has two flats and is based on the Bb major scale:

13 America, The Beautiful

Bb F F7 Bb

F C7 F7

Bb F7 Bb

Bb Bb Eb F7 Bb

PRIMARILY SPEAKING

Each key has a set of **primary chords**, the chords most commonly used for songs in that key. (Of course, other chords will also be played, but these are the primary ones.)

A key's primary chords are usually the **root** ("tonic"), **fourth** ("subdominant"), and **fifth** ("dominant"). Roman numerals are often used to name these chords. Find them by counting up the scale from the root of the key:

Key	Chord / Scale Tone							
	I			IV	V	*		
Key of C	C	Dm	Em	F	G	Am	Bdim	C
Key of F	F	Gm	Am	B♭	C	Dm	Edim	F
Key of G	G	Am	Bm	C	D	Em	F♯dim	G
Key of D	D	Em	F♯m	G	A	Bm	C♯dim	D
Key of B♭	B♭	Cm	Dm	E♭	F	Gm	Adim	B♭

* chord symbol explained later

NOTE: Sometimes the primary V chord is substituted with a seventh chord (V7).

Track 14 employs the primary chords of the key of C...

14 Jamaica Farewell

The musical notation for "Jamaica Farewell" is presented in four staves. The key signature is one flat (F major/C minor), and the time signature is 4/4. The melody is written in treble clef. Above the notes, the primary chords C, F, G7, and C are indicated. The melody consists of quarter and eighth notes, with a simple harmonic structure.

LESSON 3

You've got the blues...

If you haven't heard of the **blues**, then where have you been? It's been around for ages and has been used by such music legends as B.B. King, Eric Clapton, and Muddy Waters. Blues is fun (and easy) to play.

12-Bar Form

The most typical blues uses a form called **12-bar form**. This doesn't mean that the song is only twelve bars (measures) long. Rather, the song uses several 12-bar phrases (or sections) repeated over and over.

Generally, blues songs use the primary chords (I, IV, V) of the key. Listen to the following example of 12-bar blues in "G" on track 15. Then play along...

15 Blues in "G"

The musical notation shows a 12-bar blues progression in G major. It consists of three staves. The first staff has a treble clef and a key signature of one sharp (F#), indicating G major. The first staff has a chord symbol '(I) G' above the first measure. The second staff has a chord symbol '(IV) C' above the first measure and '(I) G' above the fifth measure. The third staff has a chord symbol '(V) D' above the first measure, '(IV) C' above the fourth measure, and '(I) G' above the seventh measure. Each staff contains 12 measures of music, represented by a series of slanted lines indicating a steady rhythm.

IMPORTANT: Notice the number of measures each chord is played during the 12-bar form. This is the most common 12-bar blues chord progression...

Chord		Measures
I	=	four
IV	=	two
V	=	two
V	=	one
IV	=	one
I	=	two

Turnaround, sit up, and play...

The last two bars of the 12-bar blues progression are sometimes called the **turnaround**, since it "turns" the form back "around" to the beginning. Musicians often vary the turnaround, using different chords or even a written-out riff.

In a minor blues progression (like track 16), the most common turnaround variation uses a major V7 chord in the last measure:

16 Minor Blues

The musical notation for the 16 Minor Blues progression is shown in three staves. The first staff has a treble clef and a key signature of one flat (Bb). The first measure is labeled with the chord Am. The second staff has a treble clef and a key signature of one flat (Bb). The first measure is labeled with the chord Dm, and the second measure is labeled with the chord Am. The third staff has a treble clef and a key signature of one flat (Bb). The first measure is labeled with the chord E7, the second with Dm, the third with Am, and the fourth with E7. A bracket under the last two measures (Am and E7) is labeled "turnaround".

Another variation is to play the IV chord in measure 2. This is called the **quick change**, since you "change" to the IV and "quickly" return to the I.

17 Quick Change Artist

The musical notation for the 17 Quick Change Artist progression is shown in three staves. The first staff has a treble clef and a key signature of two sharps (F# and C#). The first measure is labeled with the chord D, the second with G, and the third with D. A bracket under the last two measures (G and D) is labeled "quick change". The second staff has a treble clef and a key signature of two sharps (F# and C#). The first measure is labeled with the chord G, the second with D, and the third with D. The third staff has a treble clef and a key signature of two sharps (F# and C#). The first measure is labeled with the chord A, the second with G, the third with D, the fourth with G, the fifth with D, the sixth with G, the seventh with A, and the eighth with A7. A bracket under the last two measures (G and A7) is labeled "turnaround".

Change is good...

Instead of just slamming the same chord for each measure, try a variation—keep the same root note and simply raise the top two notes up and back on each beat. Try it with track 18...

18 Alternate Blues

Musical notation for "Alternate Blues" in 4/4 time. The piece consists of three staves of music. The first staff has a C chord above the first measure. The second staff has an F chord above the first measure and a C chord above the third measure. The third staff has G, F, C, and G7 chords above the first, second, third, and fourth measures respectively. The music features a steady eighth-note accompaniment pattern.

Take it a step further...

Now try the same approach, but break the chord—that is, alternate the top two notes with the root on each eighth note:

19 Not So Blue

Musical notation for "Not So Blue" in 4/4 time. The piece consists of four staves of music. The first staff has an F chord above the first measure. The second staff has a B \flat chord above the third measure. The third staff has an F chord above the first measure and a C chord above the third measure. The fourth staff has a B \flat chord above the first measure, an F chord above the second measure, and a C7 chord above the third measure. The music features a steady eighth-note accompaniment pattern.

Time for a solo...

Remember the blues scale from Book 1? Use it to improvise solos over a blues progression. Here's a reminder of that scale and a sample riff based on it:

"C" Blues Scale

20 Bluesy Solo

When playing the blues, almost any note sounds good.

So, don't get upset if you play a wrong note occasionally—just say you meant to play that!

LESSON 4

Shut up and shuffle!

The **shuffle feel** is a very common element of rock and blues music. It uses a new rhythmic value called a **triplet**.

Triplets

By now you know that two eighth notes equal one quarter, and four eighth notes equal one half. Guess what? Three eighth notes played in the duration of one beat (or one quarter note) is an **eighth-note triplet**.

An eighth-note triplet is beamed together with a number 3:

To count a triplet, simply say the word "tri-pl-et" during one beat. Tap your foot to the beat and count out loud as you listen to track 21:

21 Tri-pl-et

Here's a perfect example of triplets used in a well-known classical piece. Keep tapping your foot as you listen to and follow the song:

22 Jesu, Joy of Man's Desiring

Now play it yourself. Keep thinking "tri-pl-et, tri-pl-et, tri-pl-et, tri-pl-et" as you tap your foot to the beat...

You can also use the word "cho-co-late" to help you count triplets. (Of course, this could make you really hungry after counting a long song!)

Sure—classical can be considered a type of musical style, but we want to keep rockin'. So, moving up a few centuries in music, let's play some triplets in a rock-style shuffle à la Jerry Lee Lewis...

23 Three of a Kind

Musical notation for "Three of a Kind" in 3/4 time. The piece consists of four staves of music. The first staff has a C chord and contains two measures of eighth-note triplets. The second staff has F and G7 chords and contains two measures of eighth-note triplets. The third staff has C, F, C, G, and C chords and contains two measures of eighth-note triplets. The fourth staff has a C chord and contains one measure of eighth-note triplets followed by a whole rest.

Triplets can also include rests. Most common is to have a rest within the triplet (between two eighth notes):

Musical notation for a triplet with a rest, labeled 24. It shows a single measure of a triplet in 3/4 time, where the first eighth note is replaced by a whole rest.

Once you get the hang of this "bouncy" feel, you'll never forget it...

24 Strawberry

Musical notation for "Strawberry" in 3/4 time. The piece consists of four staves of music. The first staff has a C chord and contains two measures of eighth-note triplets. The second staff has F and G7 chords and contains two measures of eighth-note triplets. The third staff has C and G chords and contains two measures of eighth-note triplets. The fourth staff has F, C, and G chords and contains two measures of eighth-note triplets.

PLAYING TIP: It's an easy variation—just raise your pinkie up and back down. This is a very popular shuffle accompaniment pattern used by early rock 'n' rollers.

3/4...4/4...12/8?

Until this page, you've been playing with time signatures in which the quarter note equaled one beat. Time for something new (change is good!):

12 beats per measure
eighth note (1/8) = one beat

All notes and rests are relative to the value of an eighth note in 12/8 meter:

In 12/8 meter, an eighth note equals one beat and there are twelve beats per measure. But the rhythmic pulse feels like there are four beats per measure. Listen and count along to track 26, and you'll see what we mean:

You'll find 12/8 meter in well-known tunes...

Mexican Hat Dance

Musical notation for the Mexican Hat Dance in 12/8 meter. The notation is spread across five staves. The first staff has a treble clef and a key signature of one sharp (F#). Chord symbols C and G7 are placed above the first and second measures respectively. The second staff has a chord symbol C above the fifth measure. The third staff has chord symbols D7 and G alternating above the measures. The fourth staff has chord symbols D7, G, G7, and C above the measures. The fifth staff has chord symbols G7 and C above the measures. The notes are eighth notes, mostly grouped in threes per measure.

In ballads...

28 Ballad in 12/8

Musical notation for 'Ballad in 12/8' in treble clef, 12/8 time signature. The piece consists of four staves of music. The notes are primarily eighth notes, often grouped in threes. Chord symbols are placed above the staves: F, Am, Dm, B^b, C, F, Am, B^b, A/C[#], Dm, C, B^b, C, Am, Dm, C, B^b, C, F, Am, Dm, B^b, C, F.

and especially in blues shuffles...

29 Shuffling in Chicago

Musical notation for 'Shuffling in Chicago' in treble clef, 12/8 time signature. The piece consists of four staves of music. The notes are primarily eighth notes, often grouped in threes. Chord symbols are placed above the staves: C, F, C, G7, F7, C, G7.

LISTEN AND COMPARE: The rhythmic feel of track 29 is similar to that of track 25 (on page 15). That's because 12/8 meter is divided into groups of three eighth notes, just like triplets in 4/4 meter.

LET'S GET FANCY!

Want to add some style to your styles? Now's a great time to learn some extended techniques that you've heard (or even experimented playing) but didn't know exactly how to do them.

Grace Note

...looks like this

The little eighth note with a slash through it is the **grace note**. You don't have to count it, because (theoretically) it has no rhythmic value. Instead, you play it very quickly just before the melody note it precedes. Check out track 30 for a better understanding:

30 St. Louis Blues

Musical notation for "St. Louis Blues" in 12/8 time. The piece features a melody with grace notes and is accompanied by chords G7, C7, and D7. The notation is spread across four staves.

Grace notes can also precede chords and intervals. They can make a blues jam sound first-class:

31 Graceful Shuffle

Musical notation for "Graceful Shuffle" in 12/8 time. The piece features a shuffle rhythm with grace notes preceding chords and intervals. The notation is spread across two staves.

You can also play multiple grace notes. These are beamed together like sixteenths (but again, they have no rhythmic value). As with the single grace note, play them as quickly as possible, as if you are "rolling" into the melody note.

32

IMPORTANT: Multiple grace notes can be tricky if you don't use correct fingering. We've given you some sample fingering on these two examples.

32 Rags to Riches

Tremolo

...looks like this

You simply alternate between the two interval notes as quickly as possible. Very popular in rock music is the **octave tremolo**. Put your hand in position to play the octave, then quickly rock your hand back and forth.

IMPORTANT: Notes that are tremoled are shown with the same rhythmic value. However, you only count the value of one of them. That is, a whole-note tremolo will show two whole notes in a measure, but you play the value of one whole note.

33 Fast and Furious

Add a tremolo to a chord—alternate the top two notes with the bottom note (again, as quickly as possible):

34 Chord Tremors

LESSON 5

Pop goes the music!

As we said in the previous lesson, 12/8 meter is great for ballads. And ballads are perhaps most closely related to the next style of music...

Pop

Pop music (short for "popular") covers a wide spectrum. Sometimes called "Adult Contemporary," this style is used by artists like Whitney Houston, Sting, Elton John, and Mariah Carey. This style is typically very melodic and used in lots of ballads:

◆ 35 Top 40 Ballad

Three staves of musical notation in 12/8 time. The first staff is a melody line with notes G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4. The second staff is a harmonic accompaniment with chords C, Am, F, G. The third staff is a bass line with chords C, Am, F, G, C.

Add a sixth interval below each melody note for an even more melodic and fuller sound. It's easy—simply locate a sixth below the first melody note and "freeze" your hand in this shape to play the rest:

Two staves of musical notation in 12/8 time. The left staff is labeled "original melody" and shows notes G4, A4, B4. The right staff is labeled "add a sixth below" and shows notes G3, A3, B3.

Try it...

◆ 36 Oh, So Sweet

Two staves of musical notation in 12/8 time. The first staff is a melody line with notes G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4. The second staff is a harmonic accompaniment with chords G, C, Am, D, Em, Am, D, G.

Of course, not all pop songs are ballads:

37 It Used to be Mine

Slash Chords

A new chord you'll see quite often in pop music is a **slash chord**. These chords indicate a specific bass note to be played. For example, C/G means to play a C chord over a G bass note. When you see a slash in a chord symbol, play the note to the right of the slash with your left hand.

38 Love Song

Musical notation for the song "Love Song". The key signature has one flat (Bb) and the time signature is 4/4. The melody consists of quarter notes: Bb4, A4, G4, F4, E4, D4, C4. The chord progression is C (C major), G/B (G major with bass G), Am (A minor), Am/G (A minor with bass G), F (F major), C/E (C major with bass E), Dm7 (D minor 7), G (G major), G/F (G major with bass F), Em (E minor), Am (A minor), F (F major), F/G (F major with bass G), G7 (G dominant 7), and C (C major). The notation includes a repeat sign after the first two measures.

For the next one, keep your left hand playing eighth notes on the bass note A while the right hand plays the specified chord:

39 Slash 'n' Pop

Musical notation for the song "Slash 'n' Pop". The key signature has one flat (Bb) and the time signature is 4/4. The melody consists of quarter notes: Bb4, A4, G4, F4, E4, D4, C4. The chord progression is A (A major), C/A (C major with bass A), D/A (D major with bass A), C/A (C major with bass A), G/A (G major with bass A), and A (A major). The notation includes a repeat sign after the first two measures.

THEORY OF RELATIVITY

Each major key has a **relative minor key**. The relative minor key is always one and a half steps (a minor third interval) below the major key's root. Why is it relative? Because it has the same key signature as the major key.

One and a half steps below G is E, so E minor is the relative minor to G:

Minor keys also have primary chords, based on the minor scale tones I, IV and V:

	I	•	IV	V				
Key of A minor	Am	Bdim	C	Dm	E7	F	G	Am
Key of D minor	Dm	Edim	F	Gm	A7	B♭	C	Dm
Key of E minor	Em	F♯dim	G	Am	B7	C	D	Em

*chord symbol explained later

IMPORTANT: Minor keys use the V7 (major) chord instead of a minor V.

Track 40 looks like it's in the key of G—one sharp. However, since the song has an overall minor sound, it's considered to be in the relative E minor key:

40 House of the Rising Sun

When playing a chord progression in the key of G, it's very easy to "shift" to the relative minor key (E minor) and use the minor primary chords over the same melody. Let's try it with the same tune as track 30 (page 18):

41 St. Louis Blues (Minor)

Em7 Am7 Em7

Am7 Em7

B7 Am7 Em7

As you can hear, substituting different chords over the same melody can dramatically change the overall sound. This kind of variation is called (think fast!) **chord substitution**. Substituting a major chord with a relative minor is a simple (but effective) form of chord substitution.

Again and again...

Another rockin' chord accompaniment is simply repeating the same chord at a fast rhythm while the band jams. Get your hands ready and start slammng:

42 Over and Over

C F C G

Take a break—call a friend and have them learn another **FastTrack™** instrument. But don't dial too fast...you're supposed to rest those fingers!

RHYTHM BREAK

Before we tackle a new style, here's an introduction to a new rhythm...

Dotted Eighth Note

Just like the dotted quarter and dotted half, a **dot** on an eighth note extends the note's value by one half. So, a **dotted eighth note** equals the length of one and a half eighth notes (or one eighth plus one sixteenth).

Dotted eighths are usually connected to a sixteenth, like this: 

It's much easier to hear this rhythm than to count it, so listen to track 43 a couple of times:

Then try playing it in a tune:

44 The Darktown Strutters' Ball

The musical notation for 'The Darktown Strutters' Ball' is presented in five staves of music in 4/4 time. The melody consists of eighth and dotted eighth notes. The chords used are: C, A7, D7, Am7, D7, G7, C/E, Cm/Eb, G7, C, A7, D7, Am7, D7, F, D7, C, E7, A7, D7, G7, and C.

The next lesson will incorporate lots of dotted eighth rhythms, since they're great for dancing!

LESSON 6

Get on the dance floor!

Like the jitterbug, waltz, and tango of earlier decades, today's music incorporates many styles that really get those feet moving...

R&B

R&B is the short way of saying "rhythm & blues." It's also sometimes called "soul." You'll find this style in the music of Stevie Wonder, Marvin Gays, The Temptations, and many others.

Play through a couple of riffs with an R&B flair. (It's important to listen to what the rest of the band is doing, too. The drum beat, syncopation, bass line, all contribute to the style being played.)

40 Motown Groove

Musical notation for "Motown Groove" in 4/4 time. The piece consists of three staves of music. The first staff starts with a G chord and contains a rhythmic pattern of eighth notes. The second staff continues the pattern with a C chord. The third staff features a G chord, a D7 chord, and a final G chord. The notation includes various rhythmic values such as eighth notes, quarter notes, and half notes, along with dynamic markings like accents and slurs.

40 Movin'

Musical notation for "Movin'" in 4/4 time. The piece consists of two staves of music. The first staff shows a sequence of chords: Bb, F/A, Gm, Gm/F, Cm, Cm/Bb, F/A, and F. The second staff continues with chords: Bb, F/A, Gm, Gm/F, Eb, Eb/F, and Bb. The notation includes various rhythmic values such as eighth notes, quarter notes, and half notes, along with dynamic markings like accents and slurs.

Funk

Funk style can be found in anything from R&B to pop to alternative. You've heard of James Brown, Prince, Rick James, and The Red Hot Chili Peppers, right? They've all used funk style. Listen to both of these tracks several times until you get that "funky feeling"...

CAUTION: Watch out for those dotted eighth-sixteenth patterns. Funk style is full of this kind of rhythm.

47 Funky Keys

N.C.

Musical notation for 'Funky Keys' exercise 47, featuring a melodic line and a bass line with chords.

48 Funkadelic

Musical notation for 'Funkadelic' exercise 48, featuring a melodic line and a bass line with chords (Gm, C, Gm, D7, F7).

Here are some more dance styles to help you "get in the groove"...

Disco

Say what you want, but disco just won't die! It came and went in the '70s but resurfaced in the '90s as a major influence on today's dance music. This undeniably unique style incorporates fast rhythms and swirling keyboard sounds. Track 49 is merely an example:

49 Disco Daze

Musical notation for "Disco Daze" in 4/4 time. The piece is written on two staves. The first staff contains a melodic line with notes and rests, and a chord progression of Am, D, Am, D. The second staff contains a bass line with notes and rests, and a chord progression of C, G, D, Am, G, Am.

Hip-Hop

A descendant of rap music, the hip-hop style is heavily influenced by reggae, R&B, funk, and (sometimes) rock. Such artists as Snoop Doggy Dogg, TLC, Warren G, and many others have made hip-hop a mainstream musical style.

50 Non-stop Hip Hop

Musical notation for "Non-stop Hip Hop" in 4/4 time. The piece is written on two staves. The first staff contains a melodic line with eighth and quarter notes. The second staff contains a bass line with eighth and quarter notes.

COOL SOUNDS: If you have an electric keyboard, try track 50 again with a "fuzzy synth" sound. Cool, huh?

MORE ON RHYTHM

Instead of three eighth notes, a triplet will sometimes contain one quarter and one eighth played in the duration of one beat. In place of the eighth note beam, a bracket is used:

Notice that this sounds like the shuffle feel. This rhythm is also the basis for another type of musical style...

Swing

Not only a dance craze from the '30s, **swing** is a specific kind of rhythm. You can swing any melody or rhythm simply by playing eighth notes as if they were a quarter-eighth triplet:

Listen to the following examples (track 52 is "straight"; track 53 is with a swing beat):

52 53 Swing This!

Four staves of musical notation in 4/4 time. The first staff contains a melody of eighth notes. The second staff contains a melody of quarter and eighth notes. The third staff contains a melody of quarter and eighth notes with some rests. The fourth staff contains a melody of eighth notes and quarter notes, ending with a double bar line and a final chord.

You try it. Remember, the first eighth of each beat should sound slightly longer than the second. (Bet you can't play it without dancing!)

LESSON 7

In perfect harmony!

You already know lots of great chords, including some major, minor and seventh chords. Let's briefly take a look at how chords are formed (so we can make some more)...

Building Chords

Generally, major and minor chords contain three notes—**root**, **third**, and **fifth**. The difference between the two chord types is simply one half step. That is, the **third** of a major chord is lowered one half step to make a **minor** chord. Take a look...

C	Cm	A	Am

Make any major chord minor simply by lowering the third by one half step; make any minor chord major by raising the third by one half step.

IMPORTANT: Almost all chord types are related in this kind of way. That is, you simply raise, lower, add, or subtract intervals to a major or minor chord to make a new type of chord.

Remember how to make a seventh chord? Simply add the note that is one whole step lower than the root of a major or minor chord:

A	A7	Am	Am7

Wanna learn to make some new chords? Turn the page...

Augmented

Any major chord can be made into an **augmented** chord simply by raising the fifth by a half step. The suffix for an augmented chord is "aug" or "+".

Augmentation

Diminished

Any minor chord can be made into a **diminished** chord by lowering the fifth by a half step. The suffix for a diminished chord is "dim" or "~".

Diminished Chords

Suspended

Another common chord variation is the **sus chord** (short for "suspended"). It's called this because you "suspend" the third of the chord with either the **fourth** ("sus") or the **second** ("sus2").

60 Suspension Tension

Sixth

Another common chord type is the **sixth**, aptly named since you play a major or minor chord and simply add the sixth (one whole step higher than the fifth).

This one's not so tense—it's just cool and relaxed sounding:

67 Sixth Sense

Now let's jam with these new chord types:

68 Laid-Back

Musical notation for the "Laid-Back" exercise. It consists of two staves of music in 4/4 time. The first staff starts with a treble clef and a key signature of one flat (Bb). The first measure has a treble clef and a key signature of one flat, with a tempo marking of $(\text{♩} = \text{♩})$. The first staff contains the following chords: F, C+, F, Bb, Edim, Bb, F. The second staff contains the following chords: C, Cdim, C, F, C7, F. The notation includes eighth and quarter notes, rests, and chord symbols.

69 Chord Groove

Musical notation for the "Chord Groove" exercise. It consists of two staves of music in 4/4 time. The first staff contains the following chords: C, C+, F, F+, Dm, Ddim, C. The second staff contains the following chords: Am, Adim, G, G+, F, Fdim, C. The notation shows chord symbols above the staff with a treble clef.

60 Metal Vibe

Musical notation for the "Metal Vibe" exercise. It consists of two staves of music in 4/4 time. The first staff contains the following chords: Fm, A#6, Eb, Gm/Bb, Gm. The second staff contains the following chords: Fm, A#6, Eb, Eb/C. The notation includes chord symbols above the staff with a treble clef.

For tons more chords, buy *FaetTrack™ Keyboard Chords & Scales*, an excellent supplement book with over 700 chord diagrams, chord theory, and much more.

CALL IN A SUBSTITUTE!

Remember the simple **chord substitution** with minor chords in Lesson 5? Chord substitution means simply replacing the chords of a song with new chords to create a more interesting harmony. Now that you know more chord types, we can try such a technique.

Track 61 is a well-known tune, using a very basic chord progression (I—V7—I):

61 Merrily We Roll Along

C G7 C

For a more interesting harmony, find new ways to move from I to V7, using the following approaches:

- 1 Move up **diatonically** (using the scale tones for a new chord root)
Ex. C—Dm7—Em7—F—G7
- 2 Move up **chromatically** (using the next closest key for a new chord root)
Ex. C—C[♯]dim—Dm7—G7
- 3 Change to a **III7** chord in the second measure and move up in **4th intervals**
Ex. C—Em7—A7—Dm7—G7—C

Track 62 will show you how to apply each of these approaches to the tune we played above. (Each version will be played twice, followed immediately by the next one.)

62a C Dm7 Em7 F G7 C6 ^{substitute for I}

62b C C[♯]dim Dm7 G7 C6

62c C Em7 A7 Dm7 G7 C6

Of course, listening is the best way to learn—
make up your own substitutions simply by what sounds good to you!

LESSON 8

All that jazz...

Now that you're familiar with some new chord types, let's take a look at a musical style that embraces the concept of new chords...

Jazz

An American original—the jazz style features improvisation, complex chord harmony, and a variety of rhythms. Giants like Duke Ellington, Thelonius Monk, and Bill Evans have all been influential in jazz. Many variants have grown from this style, including swing, Dixieland, bebop, Latin-jazz, and fusion.

Generally speaking, anything goes in jazz music. However, there are some common elements—like the **walking bass line**. For track 63, play the chords with your right hand, while your left hand plays single bass notes, represented by the letters above the staff:

63 Walk on Over

single bass notes →

The musical notation for 'Walk on Over' consists of two staves. The first staff shows a sequence of chords: Bb, Ab, G, B, C, G, F, Eb, D, F#, G, C#, C, F, F, C. The second staff shows a sequence of single bass notes: F, B, Bb, D, Eb, Eb, D#, C, G, F, A, Bb. The notes are written on a treble clef staff in 4/4 time.

For track 64, play the notes below with your left hand. When you've got it, move your left hand down an octave or two and play it again, but this time add the chords with your right hand:

64 Bass Line Jam

The musical notation for 'Bass Line Jam' consists of three staves. The first staff is labeled C7 and shows a bass line of quarter notes: C, E, G, Bb, C, E, G, Bb. The second staff is labeled F7 and C7 and shows a bass line of quarter notes: F, Ab, Cb, Eb, F, Ab, Cb, Eb. The third staff is labeled G7 and F7 and C7 and shows a bass line of quarter notes: G, Bb, Db, F, G, Bb, Db, F. The notes are written on a treble clef staff in 4/4 time.

IT'S TRICKY: Play just the right-hand chords over and over. Then play just the left-hand bass notes over and over. Then (guess what?) combine the two.

Count on it...

In addition to chord variations, jazz employs lots of cool rhythms. Tap your foot while listening to track 65 on the CD. (Notice that it uses a swing beat—that is, two eighths are played like a quarter-eighth triplet.)

The first two measures contain the simple eight-note melody that will be repeated seven times, but each time it's repeated there is a new jazzy rhythm.

♣ Rhythm Always Changes

Musical notation in 4/4 time showing a melody with seven different rhythmic patterns. The melody is: G4, A4, B4, A4, G4, F4, E4, D4. The patterns are:

- melody
- Rhythm 1
- Rhythm 2
- Rhythm 3
- Rhythm 4
- Rhythm 5
- Rhythm 6
- Rhythm 7

Once these jazzy rhythms become familiar to you, apply them to chord progressions, too:

♣ Chord Rhythms #1

Musical notation in 4/4 time showing a chord progression with a consistent rhythm. The chords are: G, Gdim/E, F#dim/D, G, Gdim/E, F#dim/D, G.

♣ Chord Rhythms #2

Musical notation in 4/4 time showing a chord progression with a consistent rhythm. The chords are: F6, Ddim, Bbm7, F6.

LESSON 9

From all corners...

Today's music is influenced by styles from all over the world. Grab your passport and climb aboard...

Reggae

Reggae was born on the small island of Jamaica. This unique music style, played by such legends as Bob Marley and Jimmy Cliff, has been influential on music throughout the world.

Notice the common rhythm used in reggae style—emphasizing beats 2 and 4:

◆ Jamaican Me Crazy

Musical notation for "Jamaican Me Crazy" in 4/4 time. The first staff shows a treble clef with a key signature of one flat (Bb) and a 4/4 time signature. The melody consists of eighth notes with a strong emphasis on beats 2 and 4. The second staff shows the bass line with chords: A, Bm7, Bm7, and A. The rhythm is consistent with the first staff.

Latin

Music from Latin America has been another major influence on dance, pop, and even jazz music. Just like their food, Latin rhythms are fresh, unique, and spicy...

IMPORTANT: Use single notes in the left hand. The letters above the staff represent single notes to be played, not chords.

◆ Salsa

Musical notation for "Salsa" in 4/4 time. The first staff shows a treble clef with a key signature of one flat (Bb) and a 4/4 time signature. The melody consists of eighth notes with a strong emphasis on beats 2 and 4. The second staff shows the bass line with chords: C, G, C, G, G, D, G, D. The rhythm is consistent with the first staff.

Pentatonic

Pentatonic literally means “having five tones.” So, you would guess correctly that pentatonic music uses only five tones in its melodies, scales and chord structures. It can be heard in anything from Asian folk tunes to heavy metal riffs.

There are two pentatonic scale patterns you should learn—major and minor.

Major Pentatonic Scale

Minor Pentatonic Scale

Now listen to how these scales work in songs. First, the Asian folk music (major pentatonic)...

72 China Moon

And now the heavy metal riff (minor pentatonic)...

NOTE: A chord that works well with pentatonic is the “5” chord. This is a two-note chord with only the root and fifth. For example, play the notes C and G for a C5 chord.

73 Heavy Keys

Country

Let's not forget our friends in Nashville—country music dates back from even before rock 'n' roll. Its form is usually simpler and more "laid back," although many of today's country artists like Garth Brooks, Reba McEntire, and Shania Twain incorporate some rock styles in their music.

NOTE: Melodies to many country songs are based on the major pentatonic scale.

74 Notes from Nashville

Musical notation for "Notes from Nashville" in G major, 3/4 time. The melody is written on a treble clef staff. Chords are indicated above the staff: G, C, D, G/B, D, G, C, D, G. The melody consists of eighth and quarter notes with grace notes.

Notice the unique use of intervals and grace notes, which contribute to country music's unmistakable sound:

75 This Must Be Tennessee

Musical notation for "This Must Be Tennessee" in G major, 3/4 time. The melody is written on a treble clef staff. Above the staff, there is a tempo marking (♩ = 120) and the text "N.C.". The notation includes slurs and ties, indicating a specific playing style.

A nice accompaniment to a country-style song is to apply a "broken chord" technique with the right hand while the left hand alternates between the chord's root and fifth. For track 76, the letter above the staff indicates **single notes** to play with the left hand (not chords!)...

76 Country Picking

Musical notation for "Country Picking" in G major, 3/4 time. The melody is written on a treble clef staff. Above the staff, there is a tempo marking (♩ = 120) and the text "N.C.". Chords are indicated above the staff: G, D, G, B, C, G, C, B^b, A, E, A, C^b, D, A, D. The notation includes slurs and ties, indicating a specific playing style.

HEY, PONCHO! DON'T FORGET "LEFTY"

Try a different left-hand accompaniment for ballads: play the root, fifth and octave above the root for each chord. Play them one at a time (up and then back down) like the "broken chord" technique in Book 1. Review the diagram below and listen to track 77 for a better understanding of what we mean.

For a G chord...

...play this (one note at a time)

Left-Hand Arpeggio

Now apply it to a ballad:

Backwoods Ballad

Time for another break! You owe it to yourself (and to your poor fingers).
Knitting would not be a good activity during this break?!

LESSON 10

Allow us to introduce...

When an "intro" is needed to start a song, who do you think the rest of the band will turn to? That's right—you! Well, throw some of these at them...

78 3/4 Ballad Intro

Musical notation for a 3/4 Ballad Intro. The key signature has one flat (Bb) and the time signature is 3/4. The melody consists of quarter notes: G4, A4, Bb4, C5, Bb4, A4, G4. Chords are indicated above the staff: Am, F, Dm, G.

Try that one again, but slow down the tempo of the last measure.

80 Rock Intro

Musical notation for a Rock Intro. The key signature has one flat (Bb) and the time signature is 4/4. The melody features eighth and sixteenth notes with triplets. Chords are indicated above the staff: C, N.C., F7, C, G7, C. The instruction "play 4 times" is written at the end of the second line.

81 Dance Intro

Musical notation for a Dance Intro. The key signature has one flat (Bb) and the time signature is 4/4. The melody consists of eighth notes and quarter notes. Chords are indicated above the staff: C, F, C, F. The instruction "play 4 times" is written at the end of the staff.

82 Honky-Tonk Intro

Musical notation for a Honky-Tonk Intro. The key signature has one flat (Bb) and the time signature is 4/4. The melody features eighth and sixteenth notes with triplets. Chords are indicated above the staff: C, F, C+, F, N.C. The instruction "(repeat until hand is ready)" is written at the end of the staff.

Notice the progress...

Create an intro with a simple chord progression that will lead you to the first chord of the song (usually the I chord). Some that work well are:

III—VI—II—V—I)
I—V—VI—V—V7—I)
I—III—IV—V7—I)

HOW TO DO IT: Like the primary chords in Lesson 2, use a key's scale tones to find these numbered chords. (Remember that II, III, and VI are minor and VII is diminished.)

Here are examples of chord progression intros...

83 Chord Intro #1

Ex. (Am) VI (D7) II7 (F/G) IV/V (G7) V7

84 Chord Intro #2

Ex. (C) I (Em) III (F) IV (G7) V7

Don't forget the broken chord options:

85 Arpeggio Intro

(VI) Am (IV) F (V) G (I) C (III) Dm (V) G (II) C

Keep these ideas handy...just in case you're ever asked:
"Hey, Key! Start us off in G, please!"

Exit stage left...

So, you started the song...now how do you end it? Try some of these fancy outros:

66 Bluesy Outro

67 Ballad Ending

68 Slow and Easy

...and we couldn't resist the ever-popular...

69 Shave and a Haircut

LESSON 11

Strike up the band...

As in the first book, this last section isn't a lesson...it's your jam session!

All the **FastTrack™** books (Guitar, Keyboard, Bass and Drums) have the same last section. This way, you can either play by yourself along with the CD or form a band with your friends.

So, whether the band's on the CD or in your garage, let the show begin...

We would be sad that this was the end of our relationship,
but we'll see you again in *FastTrack™ Keyboard Songbook 2*.

A FAREWELL GIFT

(...it's the least we could do!)

We expect you to use the entire book as a reference, but this has now become a tradition—a "cheat sheet" with all the chords you learned. Don't forget to practice often!

Chords

C+

Cdim

Csus

Csus2

C5

C6

What's next?

You've started to master the keyboard in just a short time, but where do you go now?

- 1 Practice, practice, practice. Continue to learn by practicing each day.
- 2 Buy *FastTrack™ Keyboard Songbooks 1 and 2*, featuring rock score format of hits from Eric Clapton, Elton John, The Beatles, Jerry Lee Lewis, and many more.
- 3 Buy *FastTrack™ Keyboard Chords & Scales*, an excellent reference book with over 700 chords and inversions, scale and mode patterns, and popular chord progressions.
- 4 Enjoy what you do. If you don't enjoy what you're doing, there's no sense in doing it.

Bye for now...

SONG INDEX

(...gotta have one!)

CD	SONG TITLE	PAGE	CD	SONG TITLE	PAGE
1	Golden Oldie	2	49	Disco Daze	27

You've been through *FastTrack* Keyboard 1 several times, and you're ready for more... you came to the right place! Continuing with the *FastTrack* series is a great (not to mention fun) way to learn the Keyboard.

Can't imagine what's left to learn? *FastTrack* Keyboard 2 begins right where Keyboard 1 ended—you'll learn more notes, more rhythms, movable shapes, plenty of cool techniques, different musical styles, and much more.

And, of course, the last section of all the *FastTrack* books (Guitar, Bass, Keyboard, Drums) are the same so that you and your friends can form a band and jam together!

Go ahead and thumb through the book. When you're convinced, buy it, take it home, power up, and get ready to rock!
