

## Mathématiques : Révision

### 1. Complète ou barre:

<p>16 :</p> 	<p>9 :</p> 	<p>19 :</p> 	<p>7 :</p> 
--	--	--	--

### 2. Indique le nombre correspondant :

				
---	--	--	---	--

### 3. Calcule les additions :

$1 + 5 = \dots\dots\dots$	$6 + 5 = \dots\dots\dots$	$5 + 2 = \dots\dots\dots$
$4 + 3 = \dots\dots\dots$	$5 + 5 = \dots\dots\dots$	$1 + 8 = \dots\dots\dots$
$3 + 1 = \dots\dots\dots$	$4 + 6 = \dots\dots\dots$	$3 + 3 = \dots\dots\dots$
$4 + 3 + 1 = \dots\dots\dots$		

### 4. Trouve le complément à 10 :

$5 + \dots\dots\dots = 10$	$6 + \dots\dots\dots = 10$	$2 + \dots\dots\dots = 10$
$3 + \dots\dots\dots = 10$	$1 + \dots\dots\dots = 10$	$4 + \dots\dots\dots = 10$

5. Entoure le plus petit nombre :

8
11
3

1
5
12

6
3
9

11
2
8

6. Regroupe les carrés en faisant des dizaines et complète le tableau :

	<table border="1"> <tr> <td>dizaines</td> <td>unités isolés</td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	dizaines	unités isolés				
dizaines	unités isolés						
	<table border="1"> <tr> <td>dizaines</td> <td>unités isolés</td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	dizaines	unités isolés				
dizaines	unités isolés						
	<table border="1"> <tr> <td>dizaines</td> <td>unités isolés</td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	dizaines	unités isolés				
dizaines	unités isolés						
	<table border="1"> <tr> <td>dizaines</td> <td>unités isolés</td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	dizaines	unités isolés				
dizaines	unités isolés
