

$$12 + 23 = \dots$$

$$12 + 23 = 5$$

The image shows the equation $12 + 23 = 5$. The numbers 12 and 23 are written with the first digit in red and the second digit in blue. A blue arc connects the top of the blue '2' in '12' to the top of the blue '3' in '23'. Above this arc is a blue number '5'. The plus sign and equals sign are black, and the final '5' is blue.

12 + 23 = 35

5

3

$$12 + 23 = 35$$

$$24 + 24 = \dots$$

$$24 + 24 = 8$$

The image displays the equation $24 + 24 = 8$. The number 24 is written in red and blue. A blue arc connects the two 4s, with a blue 8 above it. The plus sign and equals sign are black, and the final 8 is blue.

8

$$24 + 24 = 48$$

4

The diagram illustrates the addition of two 24s to get 48. A blue arc above the two 24s is labeled with the number 8, indicating that each 24 is composed of two 8s. A red arc below the two 24s is labeled with the number 4, indicating that each 24 is composed of six 4s. The numbers 2 and 4 in the 24s are colored red and blue, respectively, and the result 48 is also colored red and blue.

$$24 + 24 = 48$$

$$35 + 20 = \dots$$

$$35 + 20 = 55$$

5

$$35 + 20 = 55$$

5

$$35 + 20 = 55$$
