

Soustraction : technique des sauts

Il faut faire la soustraction suivante : **135 - 97**

Observe cette technique.

135—97?

$$\begin{array}{l} 97 \longrightarrow 100 \longrightarrow 135 \\ \quad + 3 \qquad \quad + 35 \\ 135 - 97 = \mathbf{38} \end{array} \quad \begin{array}{l} 3 + 35 = \mathbf{38} \\ \longleftarrow \end{array}$$

423—136?

$$\begin{array}{l} 136 \longrightarrow 140 \longrightarrow 200 \longrightarrow 400 \longrightarrow 423 \\ \quad + 4 \qquad \quad + 60 \qquad \quad + 200 \qquad \quad + 23 \\ 423 - 136 = \mathbf{287} \end{array} \quad \begin{array}{l} 4 + 60 + 200 + 23 = \mathbf{287} \\ \longleftarrow \end{array}$$

Et maintenant, exerce-toi. **321—295?**

$$\begin{array}{l} 295 \longrightarrow \qquad \longrightarrow 321 \\ \quad + \qquad \quad + \\ 321 - 295 = \end{array} \quad \begin{array}{l} + \quad = \\ \longleftarrow \end{array}$$

253—184?

$$\begin{array}{l} 184 \longrightarrow \qquad \longrightarrow 253 \\ \quad + \qquad \quad + \\ 253 - 184 = \end{array} \quad \begin{array}{l} + \quad = \\ \longleftarrow \end{array}$$

218—89?

$$\begin{array}{l} 89 \longrightarrow \qquad \longrightarrow \qquad \longrightarrow 218 \\ \quad + \qquad \quad + \qquad \quad + \\ 218 - 89 = \end{array} \quad \begin{array}{l} + \quad + \quad = \\ \longleftarrow \end{array}$$
