LA SYMETRIE AXIALE

Fiche 8

The image displays four examples of axial symmetry on a grid. Each example consists of a shape and its mirror image across a vertical axis. The shapes are: 1) A red butterfly-like shape and a black arrow-like shape. 2) A red stepped geometric shape and a black stepped geometric shape. 3) A red and black stepped geometric shape with internal cross-hatching. 4) A red and black star-like shape with multiple points.
