La multiplication des décimaux

On effectue d'abord la multiplication www.rendezvous.comptable.com comme si on calculait 379×25 .

Quand on a trouvé le résultat final, on compte combien il y a de chiffres dans la partie décimale en **TOUJOURS** au départ. Ici on en compte 3 (2 + 1 est 3).

Il faut donc mettre le même nombre de chiffres dans la partie décimale. Ici 3.
