

ICT Homework

Deadline: 30/06/2021

1. Open New Ms Word document
2. Create 5 sections (cover page, table of contents, chapter 1, chapter 2)
3. Write your name and group on the guard page (in the first section)
4. In the third section insert
 - a. the header of chapter one (Microsoft Windows 11)
 - b. The page number
 - c. The following text

Windows 11

On June 24, 2021, Windows 11 was announced as the successor to Windows 10 during a livestream. The new operating system was designed to be more user-friendly and understandable. It is set to release in Fall 2021.^[1] Windows 11 will be a free upgrade to all Windows 10 users.

Multilingual support

Multilingual support has been built into Windows since Windows 3.0. The language for both the keyboard and the interface can be changed through the Region and Language Control Panel. Components for all supported input languages, such as Input Method Editors, are automatically installed during Windows installation (in Windows XP and earlier, files for East Asian languages, such as Chinese, and right-to-left scripts, such as Arabic, may need to be installed separately, also from the said Control Panel). Third-party IMEs may also be installed if a user feels that the provided one is insufficient for their needs.

Interface languages for the operating system are free for download, but some languages are limited to certain editions of Windows. Language Interface Packs (LIPs) are redistributable and may be downloaded from Microsoft's Download Center and installed for any edition of Windows (XP or later) – they translate most, but not all, of the Windows interface, and require a certain base language (the language which Windows originally shipped with). This is used for most languages in emerging markets. Full Language Packs, which translates the complete operating system, are only available for specific editions of Windows (Ultimate and Enterprise editions of Windows Vista and 7, and all editions of Windows 8, 8.1 and RT except Single Language). They do not require a specific base language, and are commonly used for more popular languages such as French or Chinese. These languages cannot be downloaded through the Download Center, but available as optional updates through the Windows Update service (except Windows 8).

- d. Give the text the adequate format (line spacing, paragraph spacing, alignment)
 - e. Define the title as heading 1 and give it a number
5. In the fourth section insert
 - a. the header of chapter two (versions of Microsoft Windows)
 - b. The page number

c. Insert the following text

Windows Vista

After a lengthy development process, Windows Vista was released on November 30, 2006, for volume licensing and January 30, 2007, for consumers. It contained a number of new features, from a redesigned shell and user interface to significant technical changes, with a particular focus on security features. It was available in a number of different editions, and has been subject to some criticism, such as drop of performance, longer boot time, criticism of new UAC, and stricter license agreement. Vista's server counterpart, Windows Server 2008 was released in early 2008.

Windows 7

On July 22, 2009, Windows 7 and Windows Server 2008 R2 were released as RTM (release to manufacturing) while the former was released to the public 3 months later on October 22, 2009. Unlike its predecessor, Windows Vista, which introduced a large number of new features, Windows 7 was intended to be a more focused, incremental upgrade to the Windows line, with the goal of being compatible with applications and hardware with which Windows Vista was already compatible.^[2] Windows 7 has multi-touch support, a redesigned Windows shell with an updated taskbar, a home networking system called HomeGroup,^[3] and performance improvements.

Windows 8 and 8.1

Windows 8, the successor to Windows 7, was released generally on October 26, 2012. A number of significant changes were made on Windows 8, including the introduction of a user interface based around Microsoft's Metro design language with optimizations for touch-based devices such as tablets and all-in-one PCs. These changes include the Start screen, which uses large tiles that are more convenient for touch interactions and allow for the display of continually updated information, and a new class of apps which are designed primarily for use on touch-based devices. The new Windows version required a minimum resolution of 1024×768 pixels,^[4] effectively making it unfit for netbooks with 800×600-pixel screens.

Windows 10

On September 30, 2014, Microsoft announced Windows 10 as the successor to Windows 8.1. It was released on July 29, 2015, and addresses shortcomings in the user interface first introduced with Windows 8. Changes on PC include the return of the Start Menu, a virtual desktop system, and the ability to run Windows Store apps within windows on the desktop rather than in full-screen mode. Windows 10 is said to be available to update from qualified Windows 7 with SP1, Windows 8.1 and Windows Phone 8.1 devices from the Get Windows 10 Application (for Windows 7, Windows 8.1) or Windows Update (Windows 7).

- d. Give the text the adequate format
- e. Define the titles as heading 1 and give them numbers
- f. In second section insert a table of contents

6. Create sources and insert the following citations

1. Warren, Tom (June 24, 2021). "Microsoft announces Windows 11, with a new design, Start menu, and more". The Verge. Retrieved June 24, 2021.
2. Nash, Mike (October 28, 2008). "Windows 7 Unveiled Today at PDC 2008". Windows Experience Blog. Microsoft. Archived from the original on November 1, 2008. Retrieved November 11, 2008.
3. LeBlanc, Brandon (October 28, 2008). "How Libraries & HomeGroup Work Together in Windows 7". Windows Experience Blog. Microsoft. Archived from the original on November 2, 2008. Retrieved November 11, 2008.
4. "New Windows 8 hardware specs hint at 7-inch tablets and a Microsoft Reader". ZDNet. Retrieved March 29, 2013.

7. In the last section insert the bibliography

Good Luck
