

```
# /etc/ushare.conf
# Edit this file with 'dpkg-reconfigure ushare'
# Configuration file for uShare

# uShare UPnP Friendly Name (default is 'uShare').
USHARE_NAME=mickael (nom du partage)

# Interface to listen to (default is eth0).
# Ex : USHARE_IFACE=eth1
USHARE_IFACE=eth0 (interface réseau)

# Port to listen to (default is random from IANA Dynamic Ports range)
# Ex : USHARE_PORT=49200
USHARE_PORT= 49200 (port)

# Port to listen for Telnet connections
# Ex : USHARE_TELNET_PORT=1337
USHARE_TELNET_PORT=

# Directories to be shared (space or CSV list).
# Ex: USHARE_DIR=/dir1,/dir2
USHARE_DIR=/home/mickael/Vidéos (chemin d'accès du partage)

# Use to override what happens when iconv fails to parse a file name.
# The default uShare behaviour is to not add the entry in the media list
# This option overrides that behaviour and adds the non-iconv'ed string into
# the media list, with the assumption that the renderer will be able to
# handle it. Devices like Noxon 2 have no problem with strings being passed
# as is. (Umlauts for all!)
#
# Options are TRUE/YES/1 for override and anything else for default behaviour
USHARE_OVERRIDE_ICONV_ERR=

# Enable Web interface (yes/no)
USHARE_ENABLE_WEB= (remplacer par ENABLE_WEB=yes)

# Enable Telnet control interface (yes/no)
USHARE_ENABLE_TELNET= (remplacer par ENABLE_TELNET=no)

# Use XboX 360 compatibility mode (yes/no)
USHARE_ENABLE_XBOX= (remplacer par ENABLE_XBOX=no)

# Use DLNA profile (yes/no)
# This is needed for PlayStation3 to work (among other devices)
USHARE_ENABLE_DLNA= (remplacer par ENABLE_DLNA= no)
```
