

Le régime alimentaire des êtres vivants

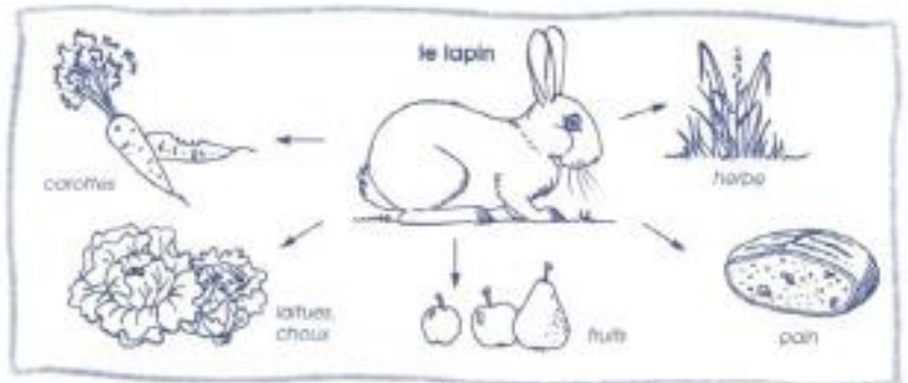

1. Qu'est ce qu'un régime alimentaire

Définition :

Le régime alimentaire désigne la façon dont se nourrit un être vivant. On distingue plusieurs régimes.

2. Les différents régimes alimentaire

Herbivores

Omnivores

Carnivores

3. Chaîne alimentaire

Définition :

La chaîne alimentaire décrit l'ordre dans lequel les êtres vivants se nourrissent en se mangeant les uns les autres.

Voici l'exemple d'une chaîne alimentaire:

Les glands sont mangés par l'écureuil qui est mangé par le renard.

- Retrouve l'ordre de ces chaînes alimentaires:
-  = est mangé(e) par
