Ajouter un nombre à 9 : première technique. - J'ajoute d'abord 1 (ça fait 10), puis le reste.

TABLE DE 9 # 1 (suite)

Ajouter un nombre à 9 : première technique. - Je décompose le nombre à ajouter en 1 + quelque chose. J'ajoute d'abord 1 à 9 (ça fait 10), puis le reste.

La deuxième technique consistera à ajouter 10 et retirer 1.

Les résultats seront progressivement appris par cœur à force d'être vus, revus, répétés, redessinés. Il faut aussi faire manipuler avec des jetons : réaliser les calculs sur une feuille où sont dessinées vingt cases vides.
