

DEVOTEE, WHAT DOES THAT MEAN?

IN SHORT:

Devotee (in English) is translated into French by fervent. This term refers to a person attracted to the person with disabilities.

When you walk on sites dealing with this subject, we see that men are more often attracted to amputee women, while women are more often attracted to men with paraplegia.

HOW DOES IT FEEL LIKE?

Personally, I feel being born that way. But I have been able to put a word about when I was 20 years. When I was young, I could not imagine playing with my dolls without one of them is disabled (in my game). Besides, I often reply that there is no history with the "normal" people. Then they grow up, I began to realize that boys with disabilities, or more particularly in a wheelchair, intrigued me. And then one day, I must admit, the men in wheelchairs make me the effect.

DEVOTEE LIVING IN SOCIETY:

The society is not suitable for wheelchair users, and does not understand that non-disabled people can find them attractive. So for my part, I have hidden this long and attraction to everyone. But comes an age where I wanted to understand, where I wanted to be honest with myself, and then I started looking for answers, and that is the Internet we find them. And more I found answers, and more I had questions ... And then I understand than confessing to be devotee is like being gay. Some people get it, some not, some people will be happy to learn it and others disgusted.

DARE SAY WHO WE ARE:

One day, there is love and the person across in front of me across my desire. We say that is good, it's the right thing when you're in love. But this person does not know that I love more because he is disabled. So one day I took my courage in both hands, and I tried to explain. But that was then the first time I put into words a feeling I do not really understand myself. But ultimately, very understanding, over time, I could explain it more accurately my resentments.
