

Géométrie

Les solides

1 Je barre les solides qui ne roulent pas.

2 Je compte le nombre de faces de chaque solide

3 Je marque les sommets en bleu et je compte leur nombre pour chaque solide.

Les solides : le cube

1

Je compte le nombre de sommets, de faces. Je complète la définition.

Nombres de faces : 6

Nombre de sommets : 8

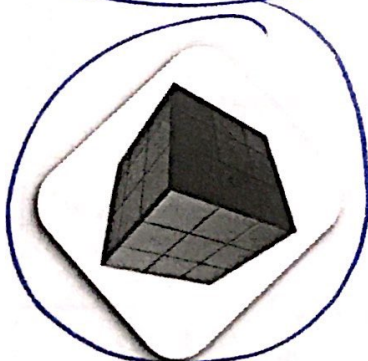

Nombre d'arêtes : 12

Un cube a 6 faces, 8 sommets et 12 arêtes.

Toutes ses faces sont des carres.

2

J'entoure tous les cubes.

Les solides : le cube

1 Je retrouve le patron du cube parmi les autres et je l'entoure.

Four nets of a cube are shown within a large rounded rectangle. The net in the top right is circled in blue.

- Net 1 (Top Left):** A vertical column of four squares with a square attached to the left side of the second square from the top.
- Net 2 (Top Right):** A vertical column of three squares with a square attached to the left side of the top square and another square attached to the right side of the middle square. This net is circled in blue.
- Net 3 (Bottom Left):** A vertical column of five squares with a square attached to the right side of the third square from the top.
- Net 4 (Bottom Right):** A vertical column of four squares with a square attached to the left side of the second square from the top.
