

Les 8 défis de la rentrée

En cascade

Trouve la valeur, entre 1 et 8, de chaque soucoupe volante pour que ces opérations soient justes.

Pour t'aider, un des nombres est déjà décodé.

$$\text{Flying Saucer 1} + \text{Flying Saucer 1} = \text{Flying Saucer 2} \times \text{Flying Saucer 1}$$

$$\text{Flying Saucer 1} + \text{Flying Saucer 2} = \text{Flying Saucer 3} + \text{Flying Saucer 3}$$

$$\text{Flying Saucer 4} = \text{Flying Saucer 2} = \text{Flying Saucer 3} = \text{Flying Saucer 5} + \text{Flying Saucer 2}$$

$$\text{Flying Saucer 4} + \text{Flying Saucer 2} = \text{Flying Saucer 1} \times \text{Flying Saucer 2} = \text{Flying Saucer 6}$$

$$\text{Flying Saucer 6} = \text{Flying Saucer 2} = \text{Flying Saucer 7} - \text{Flying Saucer 3}$$

$$\text{Flying Saucer 5} + \text{Flying Saucer 5} + \text{Flying Saucer 5} + \text{Flying Saucer 8} = \text{Flying Saucer 6}$$

$$\begin{array}{cccc} \text{Flying Saucer 1} = 4 & \text{Flying Saucer 2} = \dots & \text{Flying Saucer 3} = \dots & \text{Flying Saucer 4} = \dots \\ \text{Flying Saucer 5} = \dots & \text{Flying Saucer 6} = \dots & \text{Flying Saucer 7} = \dots & \text{Flying Saucer 8} = \dots \end{array}$$

Pose et calcule :

$$2\,454 + 12\,548 + 236 =$$

$$74\,023 - 9\,856 =$$

$$2\,478 \times 69 =$$

$$1\,371 : 3 =$$

$$1\,245,5 + 245,57 =$$

OPERATIONS
