GEOMETRY

1. Solids

Write the names of these solids.

Does the geometric pattern correspond to the solid ?

 <input type="checkbox"/> YES <input type="checkbox"/> NO	 <input type="checkbox"/> YES <input type="checkbox"/> NO	 <input type="checkbox"/> YES <input type="checkbox"/> NO
---	---	--

2. Lines & points

Find 3 points on the same line (draw the line), and 3 others.

3.

Which shapes have perpendicular lines?

Which shapes have parallel sides?

- ✓ Draw a perpendicular line (p) to (u).
- ✓ Draw a parallel line (v) to line u.
- ✓ Place on line (u), the point A which is situated 3 cm from the line (p).
- ✓ Draw line (t) and all the points which are situated 3 cm from the line (p).

6. Shapes : name, properties (except circle), areas (square & rectangle)

Complete the gray squares with the letters A to M.

Square	
isosceles triangle	

rectangle	
circle	

Right triangle	
equilateral triangle	

Trapeze	
diamond	

I have 1 right angle	
I have 4 right angles	
I have 3 angles	
My 3 sides are equal	
I have 3 sides : only 2 are equal	

I have 2 right angles	
I have no angle	
I have 4 angles	
I have 2 small sides and 2 long sides	
My 4 sides are equal	

NAME

7. Square angle (90°) / less or more

Fill the chart, classifying the angles formed by the scissors.

Less than 90°	Right angle (90°)	More than 90°

Paint the angles according to code :

Code:

- right angles in blue;
- less than 90° in yellow;
- more than 90° in red.
