Calcule selon l'exemple.

$$\textcircled{64} + 16 = \textcircled{74} + 10 + 6 = 90$$
$$84 + 6$$

The diagram shows the decomposition of 16 into 10 and 6. Two curved arrows point from the 10 in the second equation back to the 64 in the first equation, indicating the addition of 10 to 64 to reach 74. A straight arrow points from the 6 in the second equation to the 6 in the third equation, showing the final addition step.
