**X**

Diagram illustrating multiplication using base ten blocks. A horizontal line is drawn above the blocks. Above the line, there are two groups of blocks: one with a green circle and an orange circle, and another with a green circle and an orange circle. Below the line, there are two rows of blocks. The first row has one green block, one orange block, one orange block, one orange block, and one orange block. The second row has one green block, one orange block, one orange block, one orange block, and one grey block. Below the second row, there are six empty boxes for the result.

Diagram illustrating multiplication using base ten blocks. A horizontal line is drawn above the blocks. Above the line, there are two groups of blocks: one with a cyan circle, a green circle, and an orange circle, and another with a cyan circle, a green circle, and an orange circle. Below the line, there are two rows of blocks. The first row has one cyan block, one green block, one orange block, and one orange block. The second row has one cyan block, one green block, one orange block, one orange block, one grey block, and one grey block. Below the second row, there are seven empty boxes for the result.
