

TABLE DE 8

Ajouter un nombre à 8 : première technique. Je décompose le nombre à ajouter en 2 + quelque chose. J'ajoute d'abord 2 à 8 (ça fait 10), puis le reste.

La deuxième technique consiste à ajouter 10 et retirer 2.

Les résultats seront progressivement appris par cœur à force d'être vus, revus, répétés, redessinés. Il faut aussi faire manipuler avec des jetons : réaliser les calculs sur une feuille où sont dessinées vingt cases vides.
