

# Water Cycle

**The Water Cycle  
Takes the water and moves it  
Up and Down and all around the Earth**

Evaporation comes  
When the heat from the Sun  
Warms up all the groundwater  
Then it turns to water vapor  
Condensation takes over  
It goes up to the clouds  
Water vapor cools down  
And it changes to a liquid, now

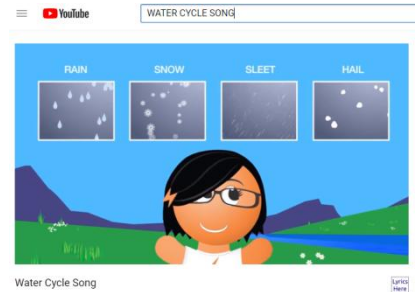

Precipitation happens  
When the drops get big  
It falls like Rain, Snow, Sleet, and Hail upon my head  
I know it's the water cycle happening again

Evaporation, Condensation, Precipitation
