

Class  
level  
1st level

Duration  
1 hour

Performed by :  
Belgium team

### Objectives

- to be able to fill in a board, row by row, with pieces who have different shapes, colors or filling and when two pieces can't be together if they have one, two or three characters in common.

### Materials

- 1 board for each gamer and a basket with fifty pieces

### Progress

- What children have to know :

how to use a double-entry table

follow instructions with negative sentences

- What to do

#### **First step**

Children observe all the pieces. Each one chooses two of them and explains how many differences they are between both : color, shape or filling

#### **Second step**

According to their age, children take the blue table (easy), the green one, (medium) or the red one (hard).

They try to put different pieces on the first row, respecting the instruction : one difference for blue table, two for the green and three for the red one.

#### **Third step**

Children read together the rules of the game and start playing together.
