

Class level

- 4 – 5 – 6
- 10 – 12 years

Duration

- 40 minutes

Performed by :

- Anaïs Héberlé / Caren Geiger
- Ecole Aalberg
- Sainte-Marie-aux-Mines / France

Objectives

- Identify the axes of symmetry
- Know the main geometric figures

Materials

- Pictures to discover the lesson
- Lesson
- Game “Symmetry”

Progress

- Discover of the lesson: 10 minutes
 - Show the pictures to the students and ask them what they notice.

- Collective discussion and lesson writing on the board:

Lesson: 10 minutes

- When a geometric figure is folded into two identical and superimposable parts, we say that this figure is symmetrical in regards to the straight line. A figure can have several axes of symmetry. The above mentioned straight line is one of these axis of symmetry of the figure.
