### A LA UNE

## A new tower to live in the clouds in New York City!

The world's tallest residential tower is being builtin New York City (US). The Central Park Tower will be 472 metres high, with 131 floors and 179 luxury flats!

#### DID YOU KNOW

The block of flats is called 'Central Park Tower' because it is located beside this famous big park.

the top of the building - sky - tower/skycraper - lake - grass - tree

### PHOTO OF THE WEEK

Don't be afraid! This snow leopard called Babochka was born in May at Toledo Zoo (US).

A few days ago, she came out in public for the first time, with her mum.
