6 Element de culture :  
Manhattan in New York

There are many towers in Manhattan.

L'Empire State Building est l'immeuble le plus mythique de New York. Il est situé sur l'île de Manhattan et tire son nom du surnom de l'Etat de New York, The Empire State.

Avec sa silhouette en forme de gradins, c'est un bâtiment de type Art Déco haut de 381 mètres. A sa construction en 1931, il était le gratte-ciel le plus haut du monde. Il possède 102 étages dont deux plates-formes d'observation au 86<sup>ème</sup> et 102<sup>ème</sup> étage qui offrent une incroyable vue panoramique sur New York. En 1933 il est rendu célèbre par un film, King Kong où le gorille escalade le building. L'Empire State Building a malheureusement récupéré son titre de plus haut building de New York après la destruction du World Trade Center en 2001. C'est sans doute avec la statue de la liberté, l'un des symboles de l'histoire New Yorkaise.
