

# HOW OFTEN DO YOU THINK IT BY DAY?

"How often do you think dev thoughts?

Every day? Once a week? 10x per day?

When I was younger I don't recall thinking or feeling them so often or so strong.

It is a daily- sometimes several times per day feeling for me.

The older I get the more often they come"

"It depends, really. Some days, not a single thought. More often, if I have seen a 'trigger'

movie, or read something or conversed with someone about the topic. So, if we are taking a survey, I'd say maybe once or twice a week at this particular time. There have been periods in my life where it has been 10x a day or more (if I was actively involved in a relationship with a wheeler or about to embark upon one.)"

"Since I am with a wheeler (even if it is a distance relationship) does it mean that I am having dev thoughts every time I think about him? ...and then when I have free time I check the forum,...so I guess that makes for good quantity of time spent on the matter.

However, I do think that before I realized/pin pointed the attraction the thoughts were more suppressed....I do feel more openly indulgent in them now than I did back then."

"I think devo thoughts almost daily, maybe a couple times a day. Me too, the older I get, the more often they come, although I still have periods where it will die down for awhile. I used to have a strong devo reaction whenever I saw the type of wheeler that I like. Now that I'm wheeling more, that doesn't happen. It's like nothing, very matter of fact, and non-devo. Which is somewhat disconcerting, because all my life I've had this strong reaction to wheelers. I can't even begin to analyze that, and probably don't want to! But it still comes in my thoughts and fantasies and when perusing YouTube."

"At least 2 or 3 times a day.

When I'm in the "unfeeling stage" I think of my devness because I wonder what's wrong with me because I'm not the same (I know... it's really twisted!!)

But, in normal days... I could say I think 3 or 4 times."

"It really depends on the day, and where I am in the dev cycle. Also if I am preoccupied with other aspects of my life or if I encounter any 'triggers' in my day... when I think about men in general I am usually imagining a wheeler.

So in summary, my answer would be "fairly regularly"."

"I recently started dating a wheelchair n I find myself thinking about him all the time. But I don't think it's necessarily dev thoughts. It's just him as a whole... (Oh dear, going all sappy now!!) With this guy, it's strange...I never think about his chair when I find myself daydreaming. Maybe finding him has made my devness fade to an extent???"

My opinion:

Some days I wish I could think about all day, as a relaxation, a way to escape, and NOTHING! And then other days, I would have to be calm (in society), and the smallest details of disability excites me. But as a rule, when I'm alone at night before I sleep, I think a lot, it relaxes me. Otherwise, it is true that a trigger can lead to need to talk. But for me, having thoughts of devotee, it is primarily a way to make me happy, to relax. So when I'm in a period too stressed, I can not cause, nor has enjoyed, thoughts of devotee. And then when calmer period, on vacation, I spend my day much to think about it. So in my case, it's a bit "all or nothing".
