6.4.005bis

The Challenge and Masters level categories held during the annual UCI BMX World Challenge shall be those defined in articles 6.1.009 to 6.1.011. However, the following exceptions shall apply.

From 2021 onwards, the minimum age eligible to enter the event shall be age 8, as of 31st December of the year in question. For avoidance of doubt, beginning in 2021, the youngest challenge categories offered during the UCI BMX World Challenge shall be as follows:

20-Inch Bicycles

- **Boys, age 8**
- **Girls, age 8**

Cruisers

- **Boys, ages 12 and under**

6.4.006 Pre-registration for the UCI BMX World Challenge event is subject to the following restrictions:

- b. Each national federation shall be permitted to register up to 16 riders in each Masters category.
- c. The limits specified in 'a' and 'b' above exclude the riders ranked from 1 to 8 at the UCI BMX World Challenge or Masters event of the previous year. These riders can be added on top of the riders selected according to the above criteria.

NOTE: For 2021, the riders ranked from 1 to 8 in the 2019 UCI BMX World Challenge and Masters may be added in addition to the country rider quota for the Challenge and Masters categories.

Any errors made during the registration process by a national federation, including the late entries, may be corrected at latest up until the moment of riders' confirmation. However, a fine of CHF 100 payable by the national federation may apply for each correction that is made.

All riders/team managers must attend the riders' confirmation presenting their licences and picking up their race numbers. The riders' confirmation deadlines are indicated on the official programme published on the UCI website. Riders not being confirmed before the indicated deadline, did not complete the registration procedure and will not be able to compete at the event

6.1.011 Riders licensed in the Masters category level for Standard 20 Inch bicycles are allowed to participate in the Cruiser 24-inch category corresponding to their age.

Race Format

UCI BMX World Championships

9.2.047ter

Seeding order for the 3 Motos in the BMX race is based on the latest UCI Individual BMX Ranking for each category (seeding order from highest to lowest ranked). Gate position selection order for the Motos is as per Annex 2 of Part VI: BMX.

The composition of the Motos for each category, as well as the transfer system for all Phases of the event is determined as per Annex 1 of Part VI: BMX. All riders entered in each category must participate in the Motos in order to be eligible to transfer to the Qualifiers.

NOTE: The UCI reserves the right to amend the Championships race format should unforeseen circumstances require it (example: adverse weather conditions). Should this happen, an official communique describing any changes will be sent to all team managers.

UCI BMX World Challenge and UCI BMX World Championships Masters

6.4.010 Competition categories shall be as described in articles 6.1.009 to 6.1.011.

In order to give the best chance of completing each day of the UCI BMX World Challenge within a reasonable period of time, the UCI reserves the right to change the number of Rounds of Motos that will be held for some or all of the Challenge and Masters categories should it decide that conditions (weather, large number of entries, or other) require it.

The UCI BMX World Challenge for each Challenge or Masters level category shall take place on the day it is scheduled and shall not be rescheduled. Once competition has begun on any given competition day, in case of cancellation prior to the Final, the results will be determined on the basis of the racing completed for each category in question in accordance with article 6.1.041. For any categories in which at least one round of racing has not been completed, such cancellation shall mean that no results are declared for those categories.

6.1.002 For participation in BMX events registered on the UCI International BMX Calendar, rider categories are determined by the age of those competing as defined by the difference between the year of the event and the year of birth of the rider. Riders' categories vary depending on the bicycle types defined in article 6.1.003, levels of categories as defined in article 6.1.004 as well as competition specialties as defined in article 6.1.007.

As concerns the minimum age described above, the categories held during the UCI BMX World Challenge are defined in article 6.4.005bis. Otherwise, the categories defined in articles 6.1.009 to 6.1.011 apply.

NOTE: Article 6.1.002 is abridged from the full rule in the UCI Regulations.

Category Combination Rules

6.1.012 (N) In order for a category to be held, at least five riders must be registered and confirmed in that category following rider's confirmation.

If less than five riders are entered in a category following riders' confirmation, they will be combined with an older category. However, categories with a maximum age of more than 34 shall be combined with the next younger category.

Categories for Standard 20-inch bicycles cannot be combined with Categories for Cruiser 24-inch categories, and vice versa.

In the case that any under-subscribed category cannot be combined according to these rules, this category shall not be run.

If the adequate numbers of five riders are registered and confirmed during the rider's confirmation, the category will be run even if less riders show up at the start, regardless of the reason, including injury or illness.

Combination of Categories and Results

6.1.014 (N) In any case where two or more categories are combined, the results of the combined categories must be split back into the original, separate categories based on the results summary for the combined categories.

The UCI will only award points in the UCI BMX ranking based upon the separated results.

Also, the riders are awarded the prize money that corresponds with their place in the separated results.

6.1.015 Except as provided by the combination rules in articles 6.1.012 and 6.1.013, no rider is permitted to compete outside of his age or gender group during UCI registered events.

Final Classification

6.1.041 The Final Classification of the BMX event for each category (or combined category) is determined by:

- a. The Phase reached (Final, Qualifiers, or Motos or, in the specific case of a UCI BMX Supercross World Cup with 17 or more entries in the category in question, Round 1 or Last Chance, whichever the case may be).
- b. If the Phase reached is the Final or the Qualifiers, the rank from the last completed Round within that Phase.
- c. If the Phase reached is the Motos, the total points from this Phase. In case the Motos are not completed, then the total points from all Rounds of the Motos that were completed. In the case of a UCI BMX Supercross World Cup event, for each category with at least 17 entries, in case the Last Chance phase is not completed, then those in the Last Chance Phase must be ranked below those who advanced directly to the First Round of the Qualifiers.
- d. In the case of a UCI BMX Supercross World Cup with 17 or more entries in the category in question:
 - i. If the Phase reached is Round 1, then the finish position from Round 1
 - ii. If the Phase reached is Last Chance, then the riders advancing directly to the Qualifiers from Round 1 will be ranked above the riders participating in Last Chance, with the Last Chance riders ranked according to finish position in Last Chance
- e. The time in the last heat completed, in case of ties the time from the previous heat is considered.

When the tie cannot be broken by time, then the tie-breaker in article 6.1.041ter shall apply

6.1.041bis

(N) In case of a combination of categories, the Final Classification for the combined category is split in accordance with article 6.1.014. A Final Classification for each individual category is then prepared.

Ties

6.1.041ter

This tie-breaking method is used in the following cases:

- a. In case more than 1 rider in a heat is scored with the same IRM as described in articles 6.1.034 and 6.1.035;
- b. In case a tie occurs in any particular heat where a clear decision cannot be determined from the applicable scoring system in the transferring positions in the Motos, or the Qualifiers or in the case of a UCI BMX Supercross World Cup with at least 17 entries in the category in question, Round 1 or Last Chance;
- c. In case a tie occurs when determining the Final Classification, as described in article 6.1.041.

In all of the above cases, the tie will be broken by applying the following methods in the order listed below until the tie is broken. In case a method is either not available or not applicable to the situation, then the next highest priority tie-breaking method will be used.

- a. Time in the previous heat
- b. Position in the previous heat
- c. If applicable to the situation, the rider's best finish (time, or if not available, finish position) in the preceding qualifiers preceding in descending order of Semi Final, Quarter Final, Eighth Final, et cetera, until the Motos are reached
- d. In descending order 3rd, 2nd, 1st round finish result in the Motos
- e. BMX Time Trial results (if held)
- f. For Championships categories, the UCI Individual BMX ranking, or for Challenge level and Masters categories, the national ranking or series ranking used for seeding the Motos, if any
- g. In the case of breaking ties between riders scored with the same IRM, at random.

Otherwise, if the tie cannot be broken according to the above method, then the riders concerned shall share the place in question, and the place(s) below would not be allocated. For example: 2 riders tied for 5th place in the semi-finals would both receive 9th place in the Final Classification; the next place awarded would be 11th place.

6.1.041 quarter

Should a situation arise in a heat in one of the three Rounds of Motos or non-transferring positions of a heat in the Qualifiers or in the award positions in the Final where a clear decision cannot be determined from the applicable scoring system, both riders will be scored with the better ranked finishing position. For example: a protest between 5th place and 6th place finishing position would in the case of a tied decision ultimately give both riders 5th place finish in that particular heat; 6th place would not be allocated.

Award positions in the Final shall refer to the riders ranked 1st to 3rd for the Championships and Masters categories and 1st to 8th for the Challenge categories.

2. SELECTION OF PARTICIPANTS

6. TEAM BIBS

Team Bibs – Championship Categories Only

One team bib is available for each national federation; it allows the wearer to access to the locations described during the Championship Team Manager Meeting. A deposit of 100 Euros or 100 US dollars against the return of the bib must be paid during rider confirmation; this will be returned following the return of the bib after the event. One team bib will also be granted to each UCI BMX Team upon request. National Teams with 4 or more riders entered in any category may request a second team bib if enough remain once each National Team or UCI BMX Team has had an opportunity to request a single bib; this will be done on a first come, first served basis.

When?

Team Bibs can be obtained during riders' confirmation for the championship categories:

Friday 20 August 2021, from 10:30 to 12:30

7. RACE EQUIPMENT AND CLOTHING

6.1.079 Crank arms may be of any length so long as they do not compromise the bicycle's ground clearance.

The bottom bracket bearings must be adjusted so as to allow the cranks to spin smoothly and without noticeable play.

Pedals must be securely attached to the crank arms. Toe clips and straps are not permitted. Interlocking pedal-cleat systems are allowed for all riders age 13 and older. For avoidance of doubt, riders aged 12 and under must use flat pedals with no interlocking pedal-cleat system.

Multiple speed gear systems are permitted.

6.1.081 Helmets must be of full face construction and must be equipped with a visor that has a minimum length of 10 cm. Open face helmets are not allowed. In accordance with article 1.3.002, neither the helmet nor its visor may be modified.

Helmets must be worn with the straps securely fastened whenever a rider is practicing or racing or is otherwise within the track boundaries.

When racing, from the start of a heat or run until the point in time when a rider completes the heat or run by crossing the finish line, if a rider's helmet is removed for any reason, that rider shall be considered as having abandoned the heat or run in question and will be scored as Did Not Finish (DNF).

The UCI strongly recommends that riders wear the following protection:

- Back, elbow, knee and shoulder protectors made of rigid materials
- Protection of the cervical vertebrae.

- 6.1.087** Any added aerodynamic accessories on personal equipment are not permitted.
- 6.1.088** Cameras are not permitted during racing. Otherwise, the riders are responsible for securing the fixation of the cameras in order to avoid any danger. The UCI can decide to allow a camera during racing but only for the usage of the TV production company. Metal / permanent fixtures to attach the cameras are not allowed, tape and velcro are allowed.

Cameras (as described above) may only be used by riders in the Championship level categories.

Note: The practical implementation of this rule means that on-board video cameras will only be accepted if they are attached to the helmet visor or the bicycle (in a way that does not present a safety risk). Cameras must not be directly attached to the helmet itself. Such cameras can only be used once the waiver valid for the 2021 season has been signed by the rider.

- 6.1.097** Each rider that has received a UCI International Elite Number, and also the riders that choose to ride with a world number 1 - 8, may choose to print their number on the jersey according to the following principles. Doing so is not mandatory.
- a. The colour of the number must be in strong contrast with the colour of the background.
 - b. The distance between the numbers must be 1.5 cm
 - c. The minimum height of the number must be 20 centimetres
 - d. The width of the numbers shall be;
 - i. minimum 10 cm for one-digit numbers
 - ii. minimum 20 cm for two-digit numbers
 - iii. minimum 25 cm for three-digit numbers
 - e. There should be a minimum of 5 cm of free space without publicity around the number.
 - f. As an option, display their last name across the shoulders, above the number.

Only Elite riders who received an International Elite Number through the UCI or Elite riders with a world number 1 - 8, may print an International Elite Number or world number 1 - 8 on the back of the jersey if they choose. No other riders are allowed to print a number on the back of their jersey. However, for avoidance of doubt, all riders are allowed to print their surname across the back of their jersey.

8. NUMBER PLATES

6.1.091 Each bicycle entered into the competition must have a number plate attached to the front of the handlebars.

This number plate will be provided by the UCI. Riders must use the received number plate and number colour combinations specified for the category in which they are racing as follows:

- a. Championship level
 - i. Elite Men, Elite Women: white plate, black numbers;
 - ii. Men Juniors, Women Juniors: black plate, white numbers.

- b. Challenge level/Master level
 - i. Masters, Men, Boys: yellow plate, black numbers;
 - ii. Girls, Women: blue plate, white numbers;
 - iii. Cruiser: red plate, white numbers;

During the 2021 UCI BMX World Championships and Challenge all riders must display a lateral number plate/sticker located just behind the steer tube. The UCI and the organiser will provide a lateral plate for the 2021 UCI BMX World Championships and Challenge.

6.1.093 In all UCI sanctioned BMX events a rider must display the number assigned to him in accordance with all relevant provisions of these regulations, including those concerning the International Permanent Race Number System, if applicable. A rider who fails to display the correct number will be refused their start, or relegated, if it is noticed after beginning a heat or run.

Comment: In practice, this means that a rider without the correct number may either be refused their start and scored as DNS, or scored as REL, depending upon when the error is noticed.

The area of the plate that provides a background for the number must, during the entire duration of a competition, be kept free of markings, stickers or other impediments to the number's legibility. Riders may not cut, mutilate or put additional stickers or marking on their number plate during the 2021 UCI BMX World Championships.

Handlebar number plates and side plates must be on every bicycle before practice

Following the start of the event, updates will be communicated to Teams using the details provided to the UCI Secretary during the rider confirmation.

14. DELAYS

Teams are advised that the weather may require a delay in certain cases, as may any other unforeseen circumstance or force majeure. It is possible that delays in the practice or racing program may be experienced. The UCI will follow the instructions of civil authorities concerning any such delays.

In case of a delay, the procedure used to inform the teams what will happen will be discussed during the team managers' meeting.

For the Challenge and Masters categories, the impact on the event will be as follows:

During Practice:

- Should a delay happen during practice, if possible, extra practice time may be given to those countries that experienced the delay. However, depending on the situation, it may not be possible to extend or replace any shortened or cancelled practice. In such case, the UCI's decision shall be final and can not be appealed.

During Racing:

- Should a significant delay happen during racing on any of the challenge or masters category racing days, it may not be possible to finish the UCI BMX World Challenge for those categories, depending upon the length of the delay.

The competition for each challenge and masters category will take place on the day that it is scheduled to occur without any postponement. In case of any cancellation, the competition for the affected categories will not be completed, and the results will be determined based upon the racing that has been completed for each such category.

- Should a significant delay occur, depending upon the amount of racing remaining at 22h00 local time, or in the UCI Technical Delegate's judgment, until the level of available daylight is no longer acceptable, the UCI may decide to stop the event for the concerned categories. In this case, the results will be decided in accordance with article 6.1.041 for each category, based upon the racing that has been completed for each such category. Should this happen, any ties that prevent a clear determination of the top 8 riders within each affected category will be broken using the special derogation found earlier in this competition guide. The UCI's decision to stop the event for the concerned categories shall be final and can not be appealed.

For the championship categories, the following procedure will be used:

During Practice:

- Should a delay happen during practice, if possible, extra practice may be given to those categories that experienced the delay. However, depending on the situation, it may not be possible to extend or replace any shortened or cancelled practice. In such case, the UCI's decision shall be final and can not be appealed.

During Racing:

- Should a significant delay happen during racing, it may not be possible to finish the UCI BMX World Championships, depending upon the length of the delay.

The competition for the championship categories will take place on the day that it is scheduled to occur, without any postponement. In case of any cancellation, the competition for the affected categories will not be completed, and the results will be determined based upon the racing that has been completed for each such category.

- Should this occur, depending upon the amount of racing remaining at 23h00 local time or in the UCI Technical Delegate's judgment, until the level of available daylight is no longer acceptable, the UCI may decide to stop the event for the concerned categories. In this case, the results will be decided in accordance with article 6.1.041 for each category, based upon the racing that has been completed. The UCI's decision to stop the event for the concerned categories shall be final and can not be appealed.
