MEULES DE SILEX

Qui permet d'écraser le blé

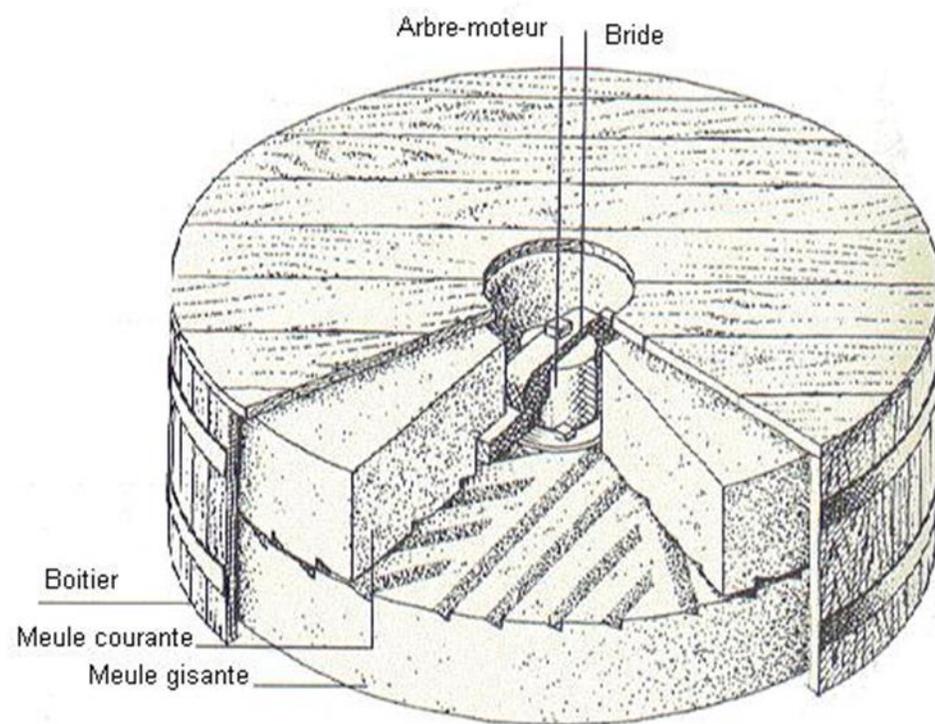

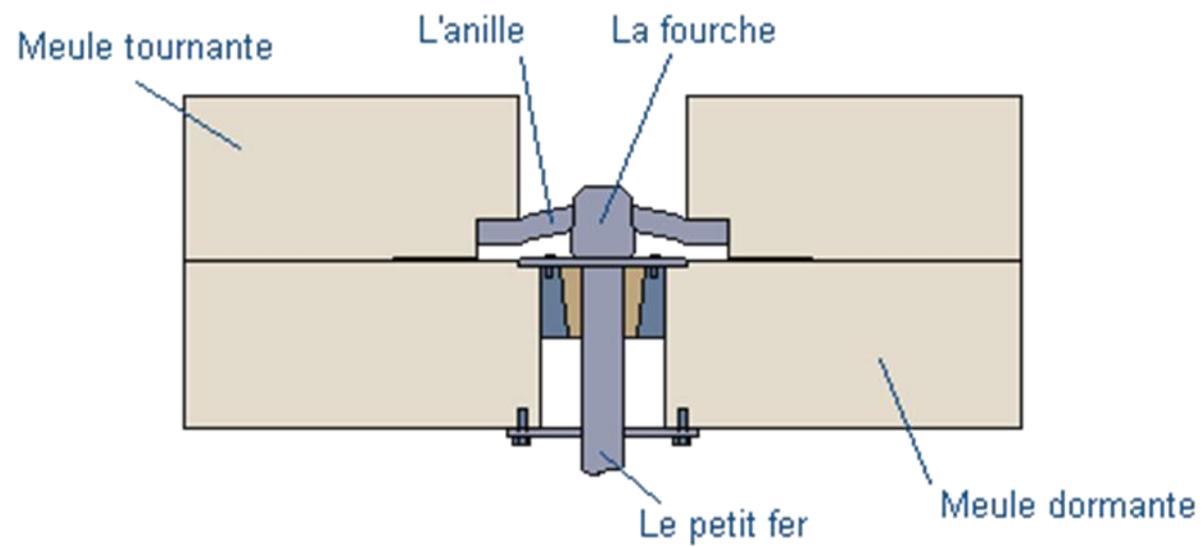

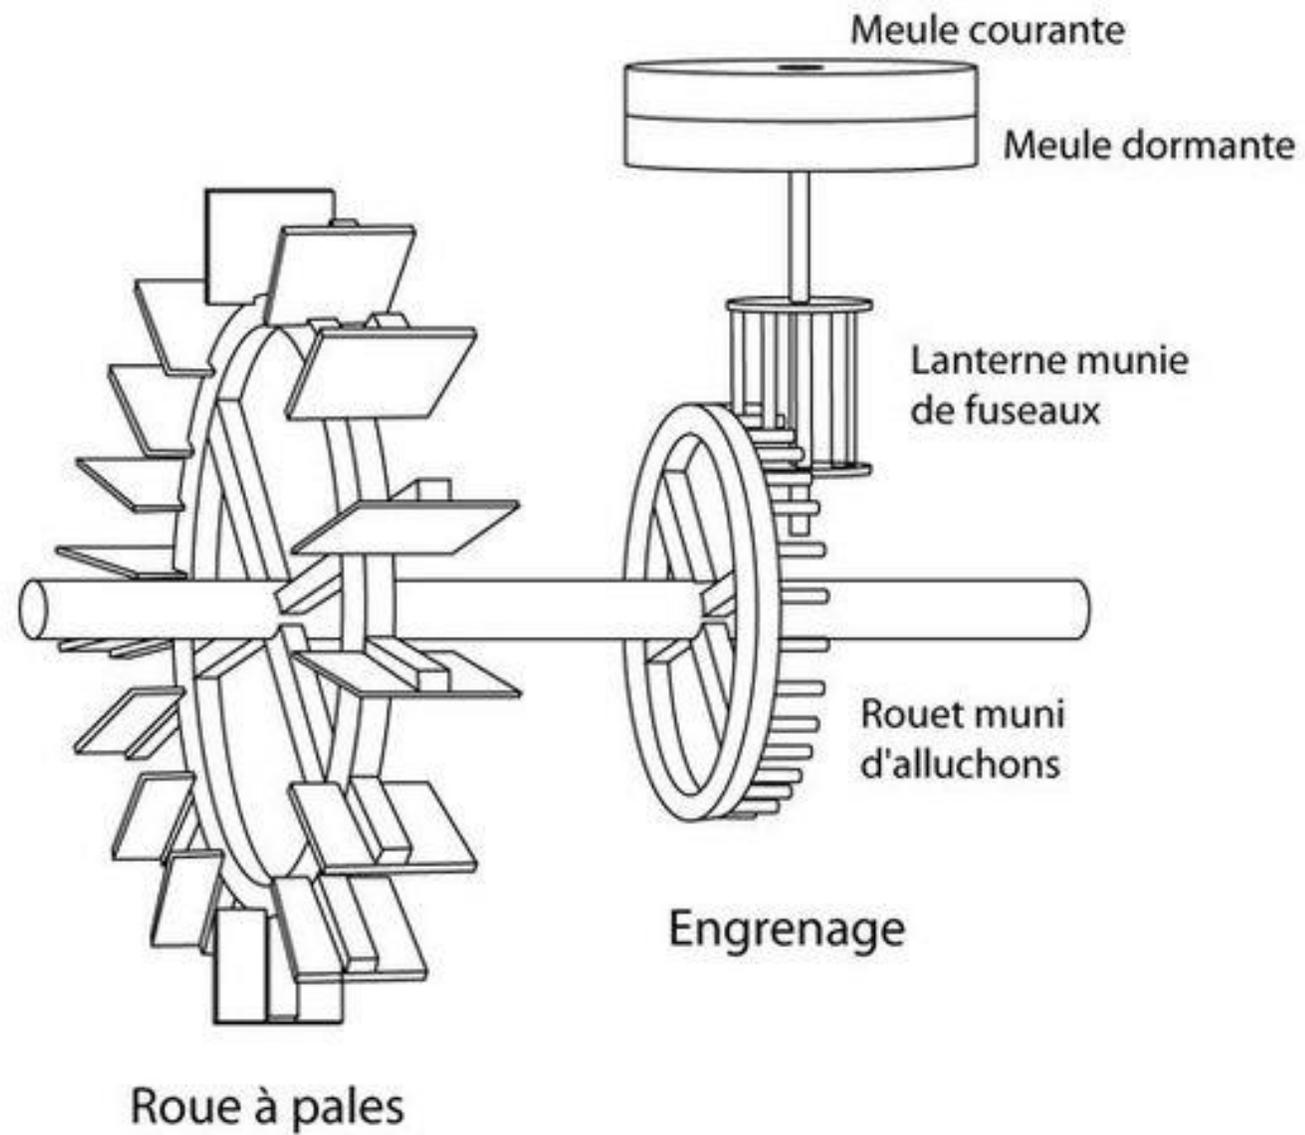

Les blés sont divisés en meules de sables dans
notre Moulin.
Particuliers de nos farines
type 55 et type 100
ces deux farines ne débouchent pas les mêmes
Loupes ?
Pourquoi se sont les farines les plus raffinées.

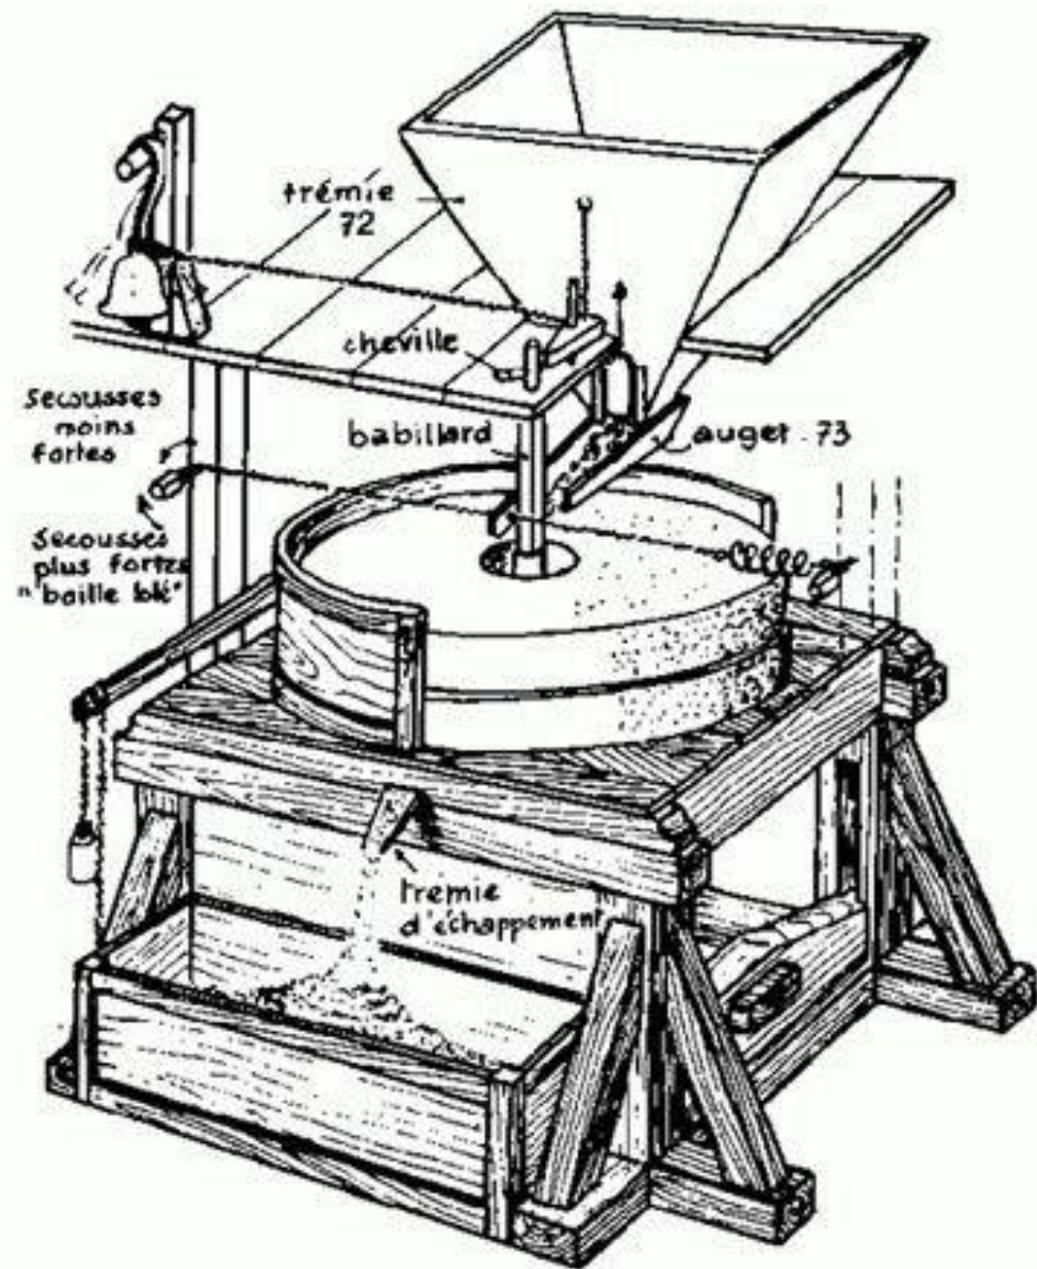

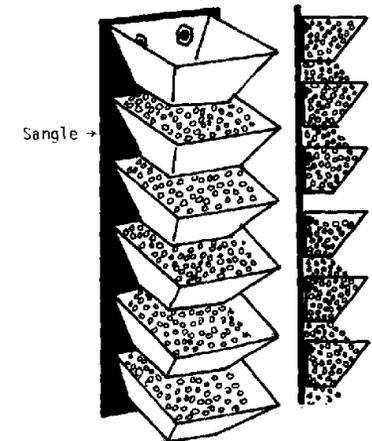

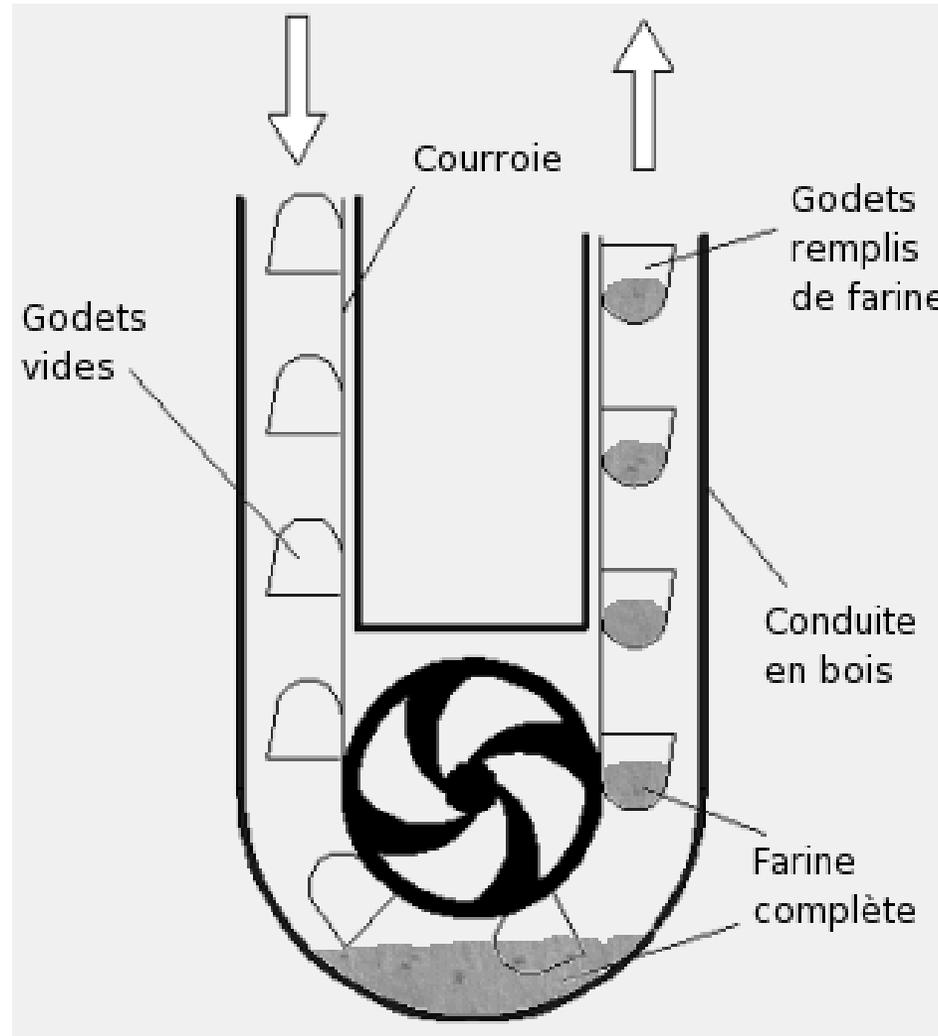

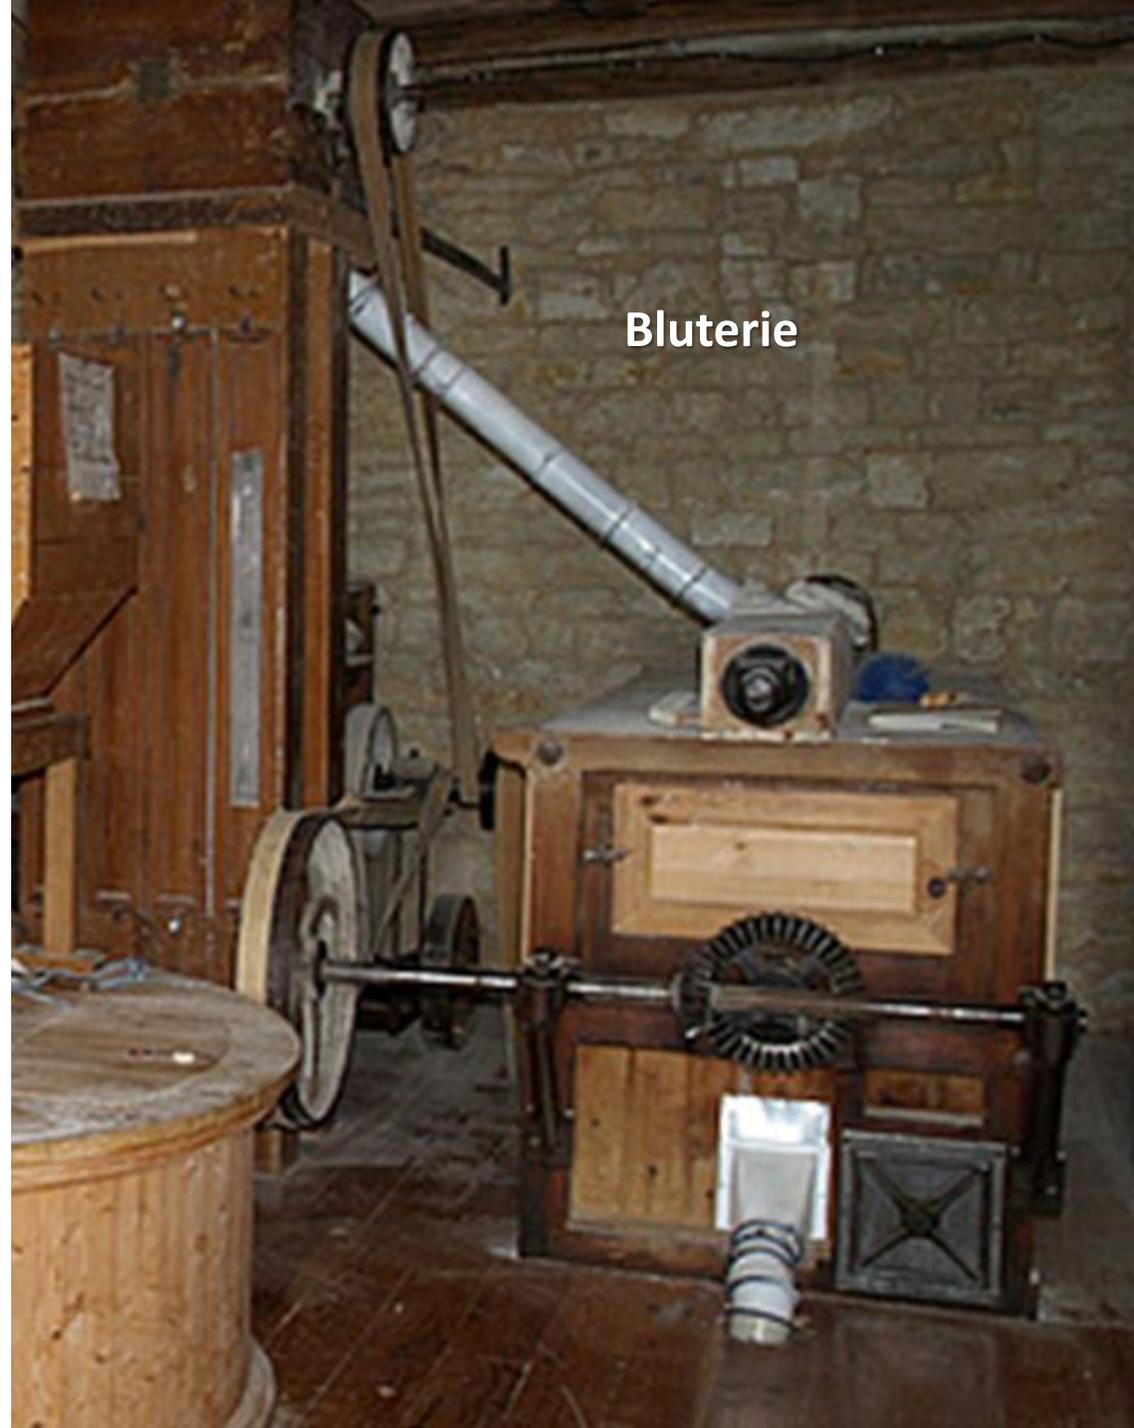

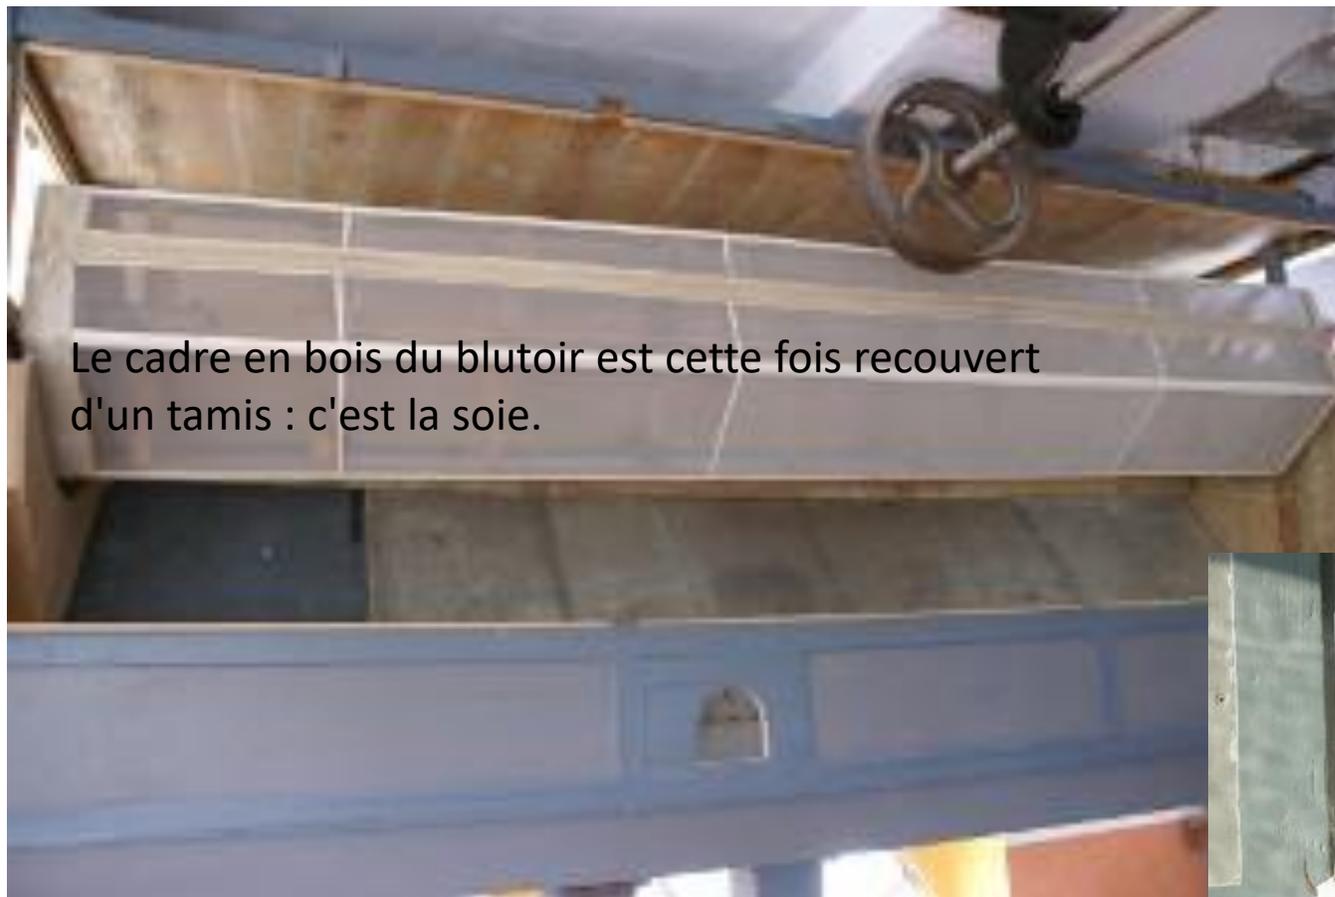

Gravure tirée de l'Encyclopédie de Diderot, XVIII^e s.
