

Earth, Moon and Sun

The Earth's Moon orbits all around us
It reflects the light from the sun
These are the phases of the Moon

When the Moon is in between The Earth and the Sun
 It's a New Moon phase And it looks like it's gone
 When the Earth is in between The Sun and the Moon
 It's a Full Moon phase And it looks like a balloon

The Earth's Moon orbits all around us
It reflects the light from the sun
These are the phases of the Moon

The Moon goes through eight different phases
 The Moon looks different, but it never really changes
 It depends on the position of the Earth, Moon and Sun
 Come on everybody make the lunar cycle fun

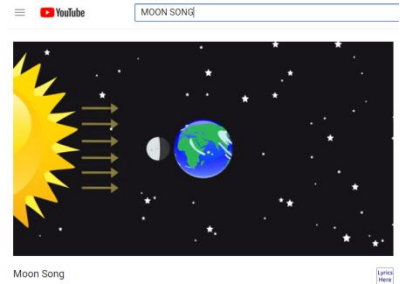

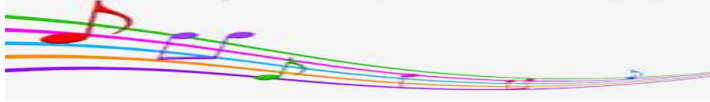

The Earth's Moon orbits all around us
It reflects the light from the sun
These are the phases of the Moon

1. New Moon,
2. Waxing Crescent,
3. First Quarter,
4. Waxing Gibbous
5. Full Moon,
6. Waning Gibbous,
7. Last Quarter,
8. Waning Crescent
